Maj. Gen. Karl Truesdell

General Truesdell Named to Command 6th Army Corps

A soldier who came up through Army ranks from private to general was named this week to head the 6th Army Corps at Providence, R. I. He was Maj. Gen. Karl Truesdell, commander of the 1st Division at Fort Hamilton, N. Y. His new appointment becomes effective Jan. 10.

At 58, General Truesdell can look back on 39 years of Army service in every rank and grade. He enlisted in the 73rd Company, CAC, in 1901. He was commissioned a 2d lieutenant in 1904 after being a corporal and sergeant in his original outfit.

During the World War, General Truesdell served as signal officer of the 33rd Division and subsequently became signal officer of the 5th Army became signal officer of the 5th Army Corps. He took part in the opera-tions at Cantigny, Soissons and St. Mihiel, an din the Meuse-Argonne. Later he was a delegate to the Inter-Allied Radio Conference at Paris, Coblenz and London. For his serv-ice he was awarded the Distin-guished Service Medal. General Truesdell has been an in-

General Truesdell has been an instructor at the Army Signal School and the General Service Schools at Fort Leavenworth, Kan. In 1935 he was detailed as instructor at the Army War College for two years.

He is a graduate of the Army Sig-nal School, an honor graduate of the School of the Line, a graduate of the General Staff School, the Army War College, and the Naval War College.

Air Corps Doubles In Six Months

Having progressed steadily but swiftly toward its expansion goal, set on June 30, 1940-namely, an Air Force of 54 combat groups made up of all types of airplanes—the Army Air Corps today is well on its way toward attaining this aim. The ma-jor objectives will have been realized within the short period of one year. The War Department announced Friday that whereas at the start of

Friday that whereas at the start of the expansion program the Air Corps consisted of 3322 Regular and Reserve officers, 1894 flying cadets and 45,914 enlisted men—all in only 16 skeleton groups and wings—by Jan. 15, the arm will have expanded to 6180 officers, 7000 cadets and 83,000 enlisted men. These figures practically double the number of officers and enlisted men, and more than triple the number of flying cadets.

On Dec. 18, 1940, four Air District headquarters were activated, along with 14 additional wing headquarters; these units will provide the overhead to care for the assignment of all personnel and planes in the 54-group program. All other groups not already activated will be activated on Jan. 15; they will be formed from existing Regular Army units.

Allotment 166,000 Men Allotment 166,000 Men
The complete personnel allotment
under the 54-group program is approximately 16,000 officers and 166,
000 enlisted men. It is expected that
by June 30, 10,100 officers, 15,000 flying cadets and 151,000 enlisted men
will be in the Air Corps. Thus, June
30 will mark an epochal date in the
history of the Army air arm.

Activation of the four district head-

nistory of the Army air arm.

Activation of the four district headquarters provided for decentralization of training and inspection duties
of the Commanding General GHQ
Air Force, and for development of
commanders and staffs for special
forces in time of possible war. Air
District headquarters will be located
initially at Mitchell Field, N.Y.; Tampa. Fla.: March Field, Calif., and Spoinitially at Mitchell Field, N.Y.; Tampa, Fla.; March Field, Calif., and Spokane, Wash. Wing headquarters—including those previously in existence—will be at the following locations: Westover Field, Mass.; Mitchell Field, N. Y.; Selfridge Field, Mich.; Langley Field, Va., and Bowman Field, Ky., all in the Northeast Air District. Augusta, Ga.; Savannah, Ga.; West Palm Beach, Fla.; Tampa, Fla.; New Orleans, La.; all in the Southeast Air District. Tucson, Ariz.; March Field, Fresno, and Hamilton Field, Calif., all in the Southwest Air District. Spokane, Wash.; Portland, Ore.; Salt Lake City, Utah, all in the Northwest Air District.

Complete Staffs Not Assigned

Complete Staffs Not Assigned

While complete staffs have not yet een assigned to air district and wing headquarters, the Air District Head-quarters squadrons are given one of-ficer and 63 men each and wing headquarters squadrons one officer and 25 men each in order to prepare for the arrival of complete headquarters.

arrival of complete headquarters.

The training of these new units will be under the direct charge of the Commanding General, GHQ Air Force, which comprises all four air districts, 17 wings and 39 of the 54 combat groups and will be carried out under the general supervision of the newly organized GHQ. The training of pilots and other specialists ing of pilots and other specialists such as navigators, bombers, radio, armament and engineering personnel devolves upon the Chief of the Air Corps who is responsible for furnishthe large amount of aircraft and er equipment needed for this large air combat force.

Guard Schedule Announced

(Editor's Note—Below appears the complete induction schedule for mustering of additional units of the National Guard, Jan. 6, 13, 16 and 17. The War Department announced it has ordered one officer from each of the 34 additional units to be assigned immediately for advance liaison duties at the center where the unit will train. These officers will be designated by the commanding generals of the eight corps areas concerned. The list of corps areas, units, home states, induction dates and training centers follows: training centers follows:) INDUCTION TRAINING CENTER

Tell No Secrets. Posters Warn

The "Don't Tell War Secrets" warnings placarded all over Eng-land now have their counterparts in our own War Department,

The new posters in the Army's offices are decorated with cartoons. The lettering is brief, "Don't Tell The lettering is brief, "Don't Tell Aunty & Uncle—or Cousin Jane," none of whose pictures flatter them, "And Certainly Not——" the warning continues, showing a siren-type gal who could probably pry secrets out of the Sphinx. showing

Old Army Units to Be in Inaugural

Military outfits that fought in ev-ery campaign in American history since the War of 1812 will march or roll along in modern armored vehicles with the newer units of the U.S. Army of 1940-41 when President Roosevelt is inaugurated on Jan. 20.

The Inaugural Committee announced Friday that among the famed outfits of early origin to march in the Inaugural Parade will be the 12th Inf., one of the oldest Regular Army regiments—organized in July, 1798 and which first saw action in the 1798 and which first saw action in the War of 1812—the 7th FA, whose Bat. A was credited with laying down the first American barrage in the World War on Oct. 31, 1917, and the 3rd Cav., organized in 1846 as the Regiment of Mounted Riflemen.

In addition to Regular Army, National Guard and other military units that traditionally participate in the inaugural parades will be many new elements of America's new peacetime Army. The parade will include a reinforced battalion of the Armored Force, 1200 men with tanks and armored vehicles from Ft. Knox, Ky.

A battery of 75-mm field guns from the streamlined 9th Div., Ft. Bragg, N. C., will include 120 men; a battery of heavy 155-mm howitzers will be accompanied by 157 men from the same fort. A composite battalion of the 213th CA, an antitank regiment formerly of the Pennsylvania NG, now at Ft. Story, Va., will have 213 men in the line of march.

New housing at Ft. Meade, Md., will shelter the visiting military units when they converge in this area for the parade. The outfits will get in practice marching by road routes on their way to and from Washington.

Hammers have been flying day and night at points between the capitol and White House where grandstands are being erected for inaugural spectators. The main grandstand will be called the Court of Freedom, in con-formance with the theme idea of the historic third - term inauguration. Flags of all the nations in the Western Hemiaphere will fly from the main grandstand.

This is one inauguration where the

Stand by For **Duty, Nurses Ordered**

Every enrolled Reserve Red Cross Nurse in Illinois, Michigan and Wis-consin has received a request for information regarding her possible assignment to active duty in the event of a National Emergency, it was recently revealed at headquar-ters of the VI Corps Area in Chicago.

Information that mobilization assignments were being made among Red Cross Nurse Reserves followed an announcement by Brig. Gen. Charles H. Bonesteel, commanding the VI Corps Area, that more than 4,000 qualified nurses would be called to duty with the armed forces be-tween now and July 1st. Hundreds have already been mobilized.

Letters sent to graduate nurses inquired as to their availability for active service in the Army Nurse Corps for one year, and the earliest date they could be ready to report

date they could be ready to report for duty.

At the present time nurses over 40 years of age will not be detailed, those engaged in public health and similar essential work will be given deferred assignments if they desire.

115 3-Year Enlistments Obtained in 3 Weeks

PORTLAND, Ore.-One hundred and fifteen three-year enlistments were obtained by the Oregon recruiting district for the Regular Army during the first three weeks of December. The men were assigned to The their chosen branches of the service without delay.

Street ...

City.

Armed Forces will strut their wares with the impress of defense bearing its full meaning. Perhaps never be fore in the nation's history has the American citizenry been so keenly keyed to the importance of defending democracy.

Paradoxically enough, at a time when the United States Government is on record with plans to render full is on record with plans to render full aid to Britain short of war, the old 12th Inf., which will march in the 1941 inaugural, fought its first battle in successful fashion against the British at Black Rock, near Buffalo, N. Y., and it also saw action in the Civil War against the South with whose soldiery the British sympathized. But the outfit was still on the job with each successive war in with each successive war in which this country participated later. The World War saw the men of the 12th soldiering with the British.

Leading News Is Military In 1940

Military developments crowded domestic news of the peacetime variety from the Associated Press' annual selection of the "10 biggest stories" this year.

Although "Roosevelt wins again' topped the list of selections, made through a poll of the AP staffmen and member newspapers, even the election "yarn" was acknowledged to have a wartime connection.

Here is the list of 1940 top stories as printed in Editor & Pub-

- 1. Roosevelt wins again.
 2. U. S. adopts conscription.
 3. France surrenders.
 4. Battle of Britain.
 5. Italy repulsed.

- Destroyers for bases
- 7. Rumania travail.
 8. Flight from Dunkerque.
 9. Russia adds territory.
 10. Flfth Column in Norway.

New Plans for 27th Div.

FORT McCLELLAN, Ala.—Adhering to the ancient rule of "Divide and multiply," the famed 27th Diand multiply," the famed 7th Division plans a policy of drastic reorganization, according to a recent headquarters bulletin. Anticipating the arrival of some 7,000 Selectees to bring the division to full strength, every unit will be split up to provide a nucleus of experienced officers and

non-coms around which will be built the new organizations.

In training circular 24, Maj. Gen. William N. Haskell, Division Commander, directed each regiment to duplicate itself by appointing a regimental commander adjusted to a support of the commander adjusted to the commande mental commander, adjutant and three battalion commanders and adjutants. Further, each company of the regiment will provide a cadre for a corresponding unit. This nucleus will consist of at least one officer, an acting first sergeant, three plateon sergeants and pine other platoon sergeants, and nine other non-coms to act as squad leaders. With the exception of the first ser-

geant, all non-coms in the cadre will be armed with the Garand rifle, and they will begin an intensive two-week refresher course, scheduled to

be completed just before the first contingent of new Selectees arrive about Jan. 20.

For training, the cadres of regiment will be formed into rifle company of three platoons: heavy-weapons company consisting of a machine gun and an antitant platoon; one headquarters platoon and one service platoon.

and one service platoon.

The execution of this plan might require consolidation of depleted units during the training period of the new organizations, but no discation of the regular training schedule is anticipated.

While these plans are basically for Infantry, other elements, including the Med. detachments, will undergo similar divisions to bring the 27th up to full strength.

The most revolutionary change with the constraints of the most revolutionary change with the constraints of the constraints.

to full strength.

The most revolutionary change will be in the field artillery. The Frend 75, undeniably the best field piece in the World War, is rapidly being transferred to antitank duty, and most artillery regiments will be supplied with the 105-mm. howitzer.

Not only does the table of organization call for new material, but the 27th Division's artillery brigade, the 52d, must organize eight new batteries. Also, the 106th F.A. will increase from 10 to 13 batteries, and will be equipped with both howitzers.

will be equipped with both howitzers and 75s for antitank defense. The 104th and 105th Regiments

through a shortage of new guns, will retain their 75s until sufficient 105-howitzers are manufactured to equip

Candidates for commissions, approximately 100 in the Division, will be assigned to the cadres. They will wear blue brassards on their arms as distinguishing marks, and will be especially instructed in command

duties.

The 27th Division is now commencing its eighth week of training in the preliminary 13-week schedule of elementary schooling. Although hampered by rain, lack of equipment, and training interrupted by extended Christmas furloughs, the New Yorkers are progressing satisfactorily, with the new men upholding the fixed traditions and records of the famous Division.

"Coordination Counts" Says Gen. Woodruff

BOSTON, Mass. - "Our defense preparation must be a rapid co-ordination of the complex machinery which is the strength of our civilization."

In those words, Maj. Gen. James

A. Woodruff, commanding the I Corps Area, summed up his interpretation of President Roosevelt's recent fire-side chat. The Commanding General was speaking over Station WAAB and the Colonial Network a few nights ago specifically to comment on the Chief Executive's address.

"It is significant that early in his fireside chat, the President warned that 'never before, since Jamestown and Plymouth Rock, has our American civilization been in such danger as now," General Woodruff said.
"That reference to Plymouth Rock brings the danger home to us in New England as perhaps no other words

"What we are doing to meet the | Service Act and the induction of the situation is not merely a question of snatching up our muskets. The only muskets in the American home today are those decorating our walls or the rifles of our vacation huntsmen. Our preparation must be a rapid co-ordi-nation of the complex machinery which is the strength of our civilization.

"The weight of each individual must be behind the program in one way or another, for—just as it was at Plymouth Rock—our success will be in direct proportion to the efforts of each of you listening to me."

each of you listening to me."

The speaker observed that the I
Corps Area has its shoulder to the
wheel "in our present program of
mobilizing manpower through recruiting of the Regular Army, and
the Flying Cadets, the smooth and
efficient operation of the Selective

National Guard, which will be climaxed on Jan. 16 by calling to the colors that famous wartime division, Massachusetts' own 26th, with battle streamers won in every important campaign of the World War."

He described New England as the manufacturing heart of the nation, and therefore, of the Army," and said the area including Boston, Worcester, Springfield, Pittsfield, Waterbury, Hartford, Bridgeport, New Ha-ven and Providence "in my opinion is the most vital and critical area in the United States to furnish the necessities for making weapons." defense

General Woodruff lauded New England's young men for rising quickly to the call for manpower.

activities of the National Jewish

Youth Sacrifices Toes To Join Up

BUFFALO, N. Y.-Thomas Grenier, 19, of West Falls, N. Y., wanted to join the Army bad, but they wouldn't take him because of a slight deformity in his feet. Tom, determined to get in, went to the hospital at his own expense to correct the defects. He sacrificed a small part of each of his toes and was shortly pronounced fit. He was accepted by the Army for immediate service in

Top Chaplains Broadcast Messages to Armed Forces

Chaplains of the Catholic, Protestant and Jewish faiths in the armed forces Wednesday sent out a New Year message to the nation's defenders urging that they seek in religion the spiritual and moral guidance needed to make them better defenders of dmocracy. The message was broadcast over the

Mutual System. Predicting that the year 1941 "is fated to be one of momentous de-cisions and events in this nation," Col. William R. Arnold, Chief of

Chaplains of the U.S. Army, added: "It is reassuring to know that all the religious groups of the nation are represented in our defensive forces and that men under arms shall have every facility to practice their religion and thereby sanctify their military service, The Govern-ment and the churches are cooperating to insure the spiritual welfare of the men in uniform."

Secedes from U.S.

CHICAGO—Asked why he had not registered for Selective Serv-ice, Alexander Reichert, 29, Lima, O., told U. S. Commissioner Edwin K. Walker of Chicago:

"I am not a citizen; I seceded from the United States Oct. 16, 1940, and established the Kingdom

1940, and established the Kingdom of Alexander."
Reichert said also he had written Sec. Hull for a "temporary right of habitation" until he could line up a kingdom to rule over. He admitted, however, he was born in this country of citizen parents.

That just about stopped the commissioner who deferred action on

missioner, who deferred action on the case until Jan. 6 while he looked up the statutes on kingdoms, rights of sovereignty, and

such things.

Were You in This Picture?

HERE'S A PHOTOGRAPH of the first caucus of the American Legion held in Paris, France, in March, 1919. If you were in this picture, please let us know and tell us about your part in organizing the American Legion. Plans are under way for the annual celebration of the founding of the Legion, which will include a national broadcast based on the founding of the organization 22 years ago. Address: Editor, Army Times, Daily News Building, Washing-

Induction Dates Postponed

34th and 40th divisions of 11 miscelneous National Guard units have been set back from one to three weeks on account of recent torrential rains, lumber strikes and other conditions over which the War Deartment had no control.

The department announced Friday that rainstorms have greatly hampered construction of temporary Claiborne, La., where the 34th Div. ousing and other facilities at Camp will train, and at Camp San Luis

San Angelo Air Center Work Begins

SAN ANGELO, Tex.-In conjunction with establishment here of a "Little Randolph Field," Government contractors have begun erecting first mits of a \$1,000,000 construction pro-

gram.

The new air center will have a \$100,000 field hangar which by Feb. 15 will house some 65 airplanes to be used in training 350 basic students, alightly less than half the total to be in training at Randolph Field, San Antonio. Work on the hangar was first to get under way.

J. C. Worrester, supervising engine.

J. C. Worcester, supervising engineer, has just inspected the completed 59-unit initial field construction and the nearly finished 11-unit hospital group, preliminary to Army Air Corps acceptance.

The first 900 men to be stationed here by the Army are due to arrive around Jan. 8. By Feb. 15, the first cadets will be in training.

Soldier Visits Mother Who Thought Him Dead

ANNISTON, Ala.—Separated since he was 4 years old from his mother, who believed him to be dead, Pvt. Oral R. Brewer, 18, stationed at Ft. McClellan, now is on special furlough

The son and mother were reunited through the Anniston and Chicago units of the American Red Cross. After the death of his parental grandmother, who reared him, the youth joined the Army. He recently was advised that his mother. Mrs. was advised that his mother, Mrs. Letha E. Whittaker, might be living in Chicago. Seeking ald from Red Cross officials, the happy reunion was effected.

Tentative induction dates of the Obispo, Calif., to which the 40th has been assigned. Induction of both divisions has been postponed two weeks, the new tentative date being set for Feb. 10.

weeks, the new tentative date being set for Feb. 10.

At March Field, Calif., where the 217th CA (AA) will train, rainstorms likewise have delayed construction, necessitating induction postponement of one week in the tentative induction date of the Hqrs. and Hqrs. Bat., 71st FA Brig., and of the 187th and 258th FA regiments, at Ft. Ethan Allen, Vt., also has been ordered. These units now will be inducted Feb. 3. This delay is due to a shortage of housing growing out of the inability of troops now at the Fort to change station to Ft. Devens, Mass., because of hampered construction work at the latter point.

From two to three weeks delay in construction work to house NG units at Ft. Lewis, Wash., will affect induction of the 144th FA, 205th CA (AA), 103d Antitank Btn., 149th Tank Btn., and 115th Cav. on the basis of that much time lost because of labor difficulties in the lumber industry.

Btn., and 115th Cav. on the basis of that much time lost because of labor difficulties in the lumber industry. New tentative induction dates for the last named units have been set as follows: 144th FA and 205th CA (AA), Feb. 1; all others, including the 109th Obs. Sqdn., Feb. 10. The squadron is attached to the 40th Div.

CCC Helps Army at Benning

FT. BENNING, Ga.—One of the prime examples of the utility of the CCC in the current defense program is seen in the work of a five-company conservation outfit on duty at this post.

After quickly erecting their own camp facilities, the CCC men set to work at the task of aiding in the extensive expansion project here. One thousand CCC men enrolled here last October and their accomplishments on the reservation are a monument to the organization. Among ument to the organization. Among the projects, some of which have been completed, are these:

Construction or improvement of roads in maneuver areas in antici-pation of the increasing need of a larger highway network as the 4th and 2d Armored divisions become

completely motorized. Clearing fire breaks and fields for 2d Armored Division ranges north

of the Buena Vista Rd.
Preparing a jumping field for the 501st Parachute Battalion adjacent to the Air Corps' Lawson Field.
Cutting roadway in 22d Infantry area and preparing site for the 8th Infantry motor park, both in the 4th Division area.

4th Division area.

Thinning or cutting trees and otherwise preparing tactical training areas for the enlarged Infantry School.

Defense Production Up But "More Is Needed"

A million persons were put to work in defense activities during the last two months of 1940 as the nation's first mass production tank factory arms output increased to 2400 aircraft engines, 700 planes, more than 10,000 automatic rifles and 100 tanks amonth.

Reporting these figures as the 1940 op at the close of December, the Deense Commission disclosed also that had approved contracts for more han ten billion dollars worth of materials and implements for defense and training purposes. Nine-tenths of this amount was to meet Army and Navy needs, including nearly three and a half billions for ships, one billion and a half for factory expansions, a billion and a half for planes and parts, 600 millions for ammunition, 500 millions for guns, and 400 millions for trucks and

All of these contracts, plus those placed by Britain and other naplaced by Britain and other nations, commit American industry to produce 50,000 airplanes, 130,000 airplane engines, 9200 tanks, 2,055,000 guns of all kinds and ammunition for them, 380 Navy ships, 200 merchant ships, 210 camps and cantonments, clothing and equipment for 1,200,000 men and 50,000 trucks.

Gun contracts embrace commitments for 400,000 automatic rifles, 1,300,000 regular rifles, 17,000 heavy guns, 25,000 light guns, 13,000 trench mortars, 300,000 machine guns, and 33 million loaded shells. Another item was to insure a new fighting ship for the Navy every 12 days.

The Commission's summary was released a few hours after President Roosevelt informed the nation Sun-day evening that armament produc-tion to date was not enough to meet the heavy demands and that "more of everything" was needed quickly.

The defense authorities disclosed The defense authorities disclosed that stock piles of such strategic materials as tin, antimony, manganese, tungsten, and chrome ore had accumulated in the past six months; production of synthetic materials had increased, and expansion of facilities to produce aluminum had been undertaken on a large scale.

It was pointed out also that 80 thousand miles of highways were be-

ment for 1,200,000 men and 50,000 thousand miles of highways were being improved to facilitate rapid movement of troops and materials.

9 USF Men Train With 250th

men of the University of San Francisco are among the 1,100 of the 250th CA now in training on the shores of Monterey Bay. Only one graduate of the university is listed among the officers. He is Lt. Ashford Sampson, Battery C, range officer.

Corp Norman Hammersly, former captain of the USF rifle team, now is 1st Battalion clerk. He will become a second lieutenant in the Officers Reserve in February.

Pvt. Bill O'Malley of 3d Battalion Headquarters used to play guard and quarterback on the USF football team. Sgts. Merton Rosen and Rich-

CAMP McQUADE, Calif.—Nine men of the University of San Francisco are among the 1,100 of the 250th CA now in training on the shores of Monterey Bay. Only one graduate of the university is listed among the officers. He is Lt. Ashford Sampson, Pattery C. range officer.

Ard Schwass and Pvt. Joe Mancuso represent USF in Battery B. Rosen is chief of the battery's gun crews. In civilian life he is a bacteriologist. He is working toward a Ph.D in bacteriology at the University of California. Schwass is an accountant, and Mancuso writes for the Camp McQuaide paper. "Overs and Shorts."

and Mancuso writes for the Camp McQuaide paper, "Overs and Shorts."

Corp. Francis Forbes, former manager of the USF football team, is in the planning and training division of 2d Battalion Headquarters, Other USF students are Pvt. Charles S. Oldfield, of Headquarters Battery, chauffeur and MP; and Pvt. Lowell F. Weyle, of Battery C, training for gun pointer.

Ordnance Plant Contracts For \$27,820,000 Awarded

Contracts for two government-owned ordnance plants were awarded this week by the War Department as follows:

To Procter & Gamble Defense Corp., Cincinnati, O., \$24,720,000, for operation of a munitions load plant, to be known as the Wolf Creek Ordnance Plant, near Humboldt, Tenn.; to Trojan Powder Co., Allentown, Pa., \$3,100,000, for operation of a TNT and DNT plant to be known as the Plum Brook Ordnance Plant, located near Sandusky Bay, west of Huron, O.

NCO Club at Chanute Elects 1941 Officers

CHANUTE FIELD, Ill.-Tech. Sgt. Paul C Almer was elected president of the Chanute Field NCO Club recently at the annual balloting. He succeeds 1st Sgt. L. J. Seibert. Other officers include: 1st VP, Tech. Sgt. G. E. Brassier; 2d VP, Staff Sgt. W. G. E. Brassier; 2d VP, Staff Sgt. W. H. Lathrop (reelected); Sec.-Treas., Tech. Sgt. L. E. Abraham (re-elect-ed); Asst. Sec.-Treas., Staff Sgt. L. R. Coddington, and these board members; Staff Sgt. B. B. Todd and Tech Sgts. V. E. Botkin and V. E. Boach

Patterson Asks for Sacrifice

By ROBERT P. PATTERSON Undersecretary of War

Nineteen forty-one dawns on the largest peacetime Army in American history in training an Army of 600,000 men. That figure will be more than doubled before the year is half

Behind this Army is a well-nigh inexhaustible reservoir of manpower. But the men-regardless of their quantity, which is vast, and regardless of their quality, which is high-are useless until we equip them. Equipment for the national defense must be the chief goal of our effort, as a Government and as a people, in 1941.

The big job, all along the line, is acceleration. The wheels are moving; they must move faster. The equipment is coming; it must come in greater volume, and still greater.

We must learn to get along without some conveniences, for the greater ultimate convenience of all of us. first call.

We are putting to use every machine we can find and make. Britain and Germany have chains of tiny factories, sometimes a single lathe in a barn, or a garage, or a shed, each playing its part in the most thorough industrial mobilization the world has ever known. Every piece of equipment that we have, however humble, however trivial of itself, must be pressed into the service of the nation's defense.

Aid to Britain is aid to America. Our own enlightened self-interest points to such a course as the height of wisdom.

How He's Grown!

Appearances are deceiving, as the feller said. The young man in the picture is not just one young man but a million, all yawning, stretching, vibrant with life after a long sleep. The way we see it, he's the whole U. S. Army.

Four days into 1941, we have recovered fully from New Year's Eve and it may be assumed we're in our right—though fanciful—mind.

right—though fanciful—mind.
Looking at the Army today, what we see is a young giant waking from a sleep of many years. While he napped, people had sort of forgotten about him. Even his ever-loving ma, whose correct name is Mrs. United States. Oh, she knew he was there, all right, but she didn't pay him much attention. She felt the way any mother feels when she's got a lot of things to do: "Well, thank heaven that child's out from under foot, anyway." You know? way." You know?

Then, a couple of months ago, this Then, a couple of months ago, this young giant started to turn and mutter in his sleep. His ma took a good look at him (for the first time in a long while) and she said to herself: "My, hasn't he grown! He's too big for those old britches of his." And she grabbed her bonnet and hurried off to the corner drugstore where, as everybody knows, you can buy anything except drugs.

If you read the papers you know

If you read the papers you know she's down there now buying every-thing in sight—clothes and guns and planes—for the young giant to play with, and maybe fight with, too, some day. It will take her a year or more to get everything the young giant is

to get everything the young giant is going to need.

As for him, he's fully awake and impatient for Ma to get back. Meanwhile, he amuses himself by flexing his muscles and marveling at how much he has grown, and thinking of what he's going to do to any tough kid who wants to throw rocks at him.

A Great Speech

President Roosevelt has never made President Roosevelt has never made a better speech than he made last Sunday night in exposition of the foreign policy of the United States at the most critical moment of its mature history. With unfailing and patient logic he explained why un-stinted aid to Britain is imperative, stinted aid to Britain is imperative, not merely to save Britain but to save America. The purpose of American foreign policy was stated in the opening sentences: "To keep you now, and your children later, and your grandchildren much later, out of a last-ditch war for the preservation of American independence and all the things that American inde-

tion of American independence and all the things that American independence means to you and to me and to ours." To avoid that "last-ditch fight" we must aid England now in her last-ditch fight.

In his admirable exposition of this simple purpose, Mr. Roosevelt disposed of the notion that America should "force" peace upon Europe at this time. "The United States," the President said, "has no right or reason to encourage talk of peace until the day shall come when there is a clear intention on the part of the aggressor nations to abandon all is a clear intention on the part of the aggressor nations to abandon all quered nation. In view of Hitler's thoughts of dominating or conquer-ing the world." That such a time will come Mr. Roosevelt, like Mr. Churchill, does not doubt. The defeatists who ill, does not doubt. The deteatists who cry out that we must accept "collaboration" with the Nazis as the "best we can hope for" got short shrift from him. Appeasement now would be merely to postpone Nazi success and leave us to "wait our turn to be the object of attack in another war later on"-a war we should have to fight alone against all the resources of a Nazi-controlled world.

It was the President's evident purpose to define the foreign policy of his Administration in the clearest terms, portray the hollowness of the alternatives and leave for future elu-Congress the specific means he has in mind to increase aid

A Great President Speaks for America

NEVER BEFORE SINCE JAMES-TOWN AND PLYMOUTH ROCK later on. HAS OUR AMERICAN CIVILIZA-TION BEEN IN SUCH DANGER AS NOW.

• • • the axis not merely admits but proclaims that there can be no ultimate peace between their phi-losophy of government and our philosophy of government.

In view of the nature of this un-

deniable threat. it can be asserted, properly and categorically, that the United States has no right or reason to encourage talk of peace, until the day shall come when there is a clear intention on the part of the aggressor nations to abandon all thought of dominating or conquering the world.

If Great Britain goes down the axis powers will control the continents of Europe, Asia, Africa, Australasia and the high seas—and they will be in a position to bring enormous military and naval resources against this hemisphere. It is no exaggeration to say that all of us in the Americas would be living at the point of a gun-a gun loaded with explosive bullets, economic as well as

explosive builets, economic as wen as military.

We should enter upon a new and terrible era, in which the whole world, our hemisphere included, would be run by threats of brute force. To survive in such a world we would have to convert ourselves personently into a militaristic power on manently into a militaristic power the basis of war economy.

Frankly and definitely there is danger ahead—danger against which we must prepare. But we well know that we cannot escape danger, or the fear of it, by crawling into bed and pulling the covers over our heads.

* The plain facts are that the Nazis have proclaimed, time and again, that all other races are their inferiors and therefore subject to their orders. And most important of all the vast resources and wealth of this hemisphere constitute the most tempting loot in all the world.

The history of recent years proves that shootings and chains and concentration camps are not simply the transient tools but the very altars of modern dictatorships. They may talk of a "new order" in the world, but what they have in mind is but a revised of the placet and the very street of th vival of the oldest and the worst tyr anny. In that there is no liberty, no religion, no hope. The proposed "new order" is the

very opposite of a United States of Europe or a United States of Asia. It is not a government based upon the consent of the governed. It is not a union of ordinary, self-respecting men and women to protect themselves and their freedom and their dignity from oppression. It is an unply ellipage of power and pelf to holy alliance of power and pelf to dominate and enslave the human

Thinking in terms of today and tomorrow, I make the direct state-ment to the American people that there is far less chance of the United States getting into war if we do all we can now to support the nations defending themselves against attack by the axis than if we acquiesce in their defeat, submit tamely to an axis victory, and wait our turn to be the

to hard-pressed Britain. There will be debate upon the various means suggested, but Mr. Roosevelt has so ably and powerfully defended the basic assumptions of his policy as to place it beyond reasonable objection. He has placed upon the appeasers, the defeatists and the conscious or unconscious agents of Hitler the bur-den of proving that we risk more by aiding Britain now than by standing own words, his trampling over nations which had his pledged word of non-aggression and the mere mechanical impetus of the Nazi "wave of the future," the burden of proving Mr. Roosevelt wrong is a heavy one. Few-er will be beguiled by these deviations, now that Mr. Roosevelt has spoken.

But exposition of policy is not enough. London fights off its most savage air raids, coming as if in answer to Mr. Roosevelt's assurance answer to Mr. Roosevelt's assurance that "the Axis powers are not going to win this war." Hard work, greater production, legal changes necessary to pursuit of this policy must follow. We believe these objects will be attained more easily because of the President's masterly exercise in dispelling fog and fear, his frank assertion of the dangers, his heartening refusal to accept perils as defeats.

Let not defeatists tell us that it is too late. It will never be earlier. Tomorrow will be later than today.

In a military sense Great Britain and the British Empire are today the spearhead of resistance to world conquest. They are putting up a fight which will live forever in the story of human gallantry. There is no demand for sending an

American expeditionary force outside our own borders. There is no inten-tion by any member of your Govern-ment to send such a force. You can, therefore, nail any talk about sending armies to Europe as deliberate un-truth.

Our national policy is not directed toward war. Its sole purpose is to keep war away from our country and our people.

THIS NATION IS MAKING A GREAT EFFORT TO PRODUCE EVERYTHING THAT IS NECES-SARY IN THIS EMERGENCY—AND WITH ALL POSSIBLE SPEED. THIS GREAT EFFORT REQUIRES GREAT SACRIFICE. GREAT SACRIFICE.

American industrial genius, unmatched throughout the world in the solution of production problems, has been called upon to bring its resources and talents into action. Manufacturers of watches, of farm implements, linotypes, cash registers, automobiles, sewing machines, lawn mowers and locomotives are now making fuses, bomb packing crates, telescope mounts, shells, pistols and tanks.

I want to make it clear that it is the purpose of the Nation to build now with all possible speed every machine and arsenal and factory that we need to manufacture our defense material. We have the men—the skill—the wealth—and above all, the will.

We must be the great arsenal of democracy. For us this is an emergency as serious as war itself. We must apply ourselves to our task with the same resolution, the same sense of urgency, the same spirit of patriotism and sacrifice as we would show were we at war.

I believe that the axis powers are not going to win this war. I base that belief on the latest and best information.

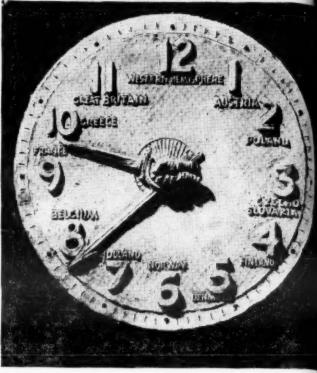

We have no excuse for defeatism We have every good reason for hope—hope for peace, hope for the defense of our civilization and for the building of a better civilization in the future.

I have the profound conviction that the American people are now deter-mined to put forth a mightier effort than they have ever yet made to in-crease our production of all the im-plements of defense, to meet the threat to our democratic faith.

threat to our democratic faith.

As President of the United States I call for that national effort. I call for it in the name of this Nation which we love and honor and which we are privileged and proud to serve. I call upon our people with absolute confidence that our common cause will greatly succeed.

"We Are Arming to the Hill since below s but one giment of i the new be the growi-ization in signed to c rticularly That We May be Secure"

Undersecretary of War Patterson made a speech over Station Wo in Washington one day this week that sounded the gong for 190 curtain. It preceded by 1½ hours the best "fireside chat" Preside it is equipy mm. antita Col. Allen

Coming one on top of the other, these two utterances by leader of the world's strongest nation struck hope and fear in the heartst people all over the earth. What people would do, once these emotion moved them sufficiently, was not at once apparent. The answer in the weeks and months lying just ahead, the year on which the curtain was just enjoying. d Training e Chief of mitted hi curtain was just going up.

Here is what Undersecretary Patterson said:

Prophecy is generally a somewhat futile enterprise, a fact whit my colleagues on this program appreciate as fully as I. But it is possible for me tonight to make one prophecy on behalf of the War Departmenthat will be borne out during 1941 unless some cataclysm sends the earth reeling off into space as a mere burnt cinder, in which case none will be able to tell me a year from now that I was complete.

That prophecy is this: During 1941 the United States will put for the most gigantic effort it has ever made in behalf of its own security

We are already embarked on that program. During 1940 Congrappropriated over eight billion dollars for the expansion of our la appropriated over eight billion dollars for the expansion of our lan forces. The men are in training, and many hundred thousands mid will enter the camps during the months just ahead. The equipment in the making, and millions upon millions of dollars worth will be turned out during 1941—more than we have ever turned out before more than we turned out during any year of the World War, more, hope, than we shall ever be called upon to turn out again. And is weapons that will be produced will be weapons of the highest quality designed to meet the exacting demands of the mechanized militar machine of our day. machine of our day.

We are training all these men and making all this equipment because we are confronted with the greatest crisis short of actual with that has ever confronted us. We are engaged on a program without parallel in our history only because the situation that impels us to the program is itself without parallel in our history.

We are arming to the hilt that we may be secure. But we cann we are arming to the nint that we may be secure. But we can be secure merely by making thousands of airplanes and tanks and gu and by raising and training and equipping one million or two million men. We must arm and equip ourselves mentally and spiritually, a well. We must see this program and this crisis for what they are the call for a spirit of unity unmatched in our history. The national delease program affects every man, woman and child among us. It is every body's program. It must be the great, the supreme endeavor of the whole American people during 1941.

Dykstra Lauds Americans For Defense Cooperation

Inauguration of the Selective Serv- | stra went on. ice system has begun a new phase of our national life that touches directly and indirectly every family and every community in the United States.

This observation was made over the week-end by Dr. Clarence A. Dykstra, director of the SS, as he outlined to the press the broad objectives of the 1940 Congressional Act that threw this nation on a peace-

time defensive alert.
"Ominous developments in our present-day world have brought unprecedented problems to democra and the year 1940 has brought a significant and radical change in our national life," the director-educator

Dr. Dykstra termed the Selective Service system "a national enterprise whose success depends upon the operation and sympathetic un understanding of people in all sections of the country." He added that the na-tion's citizenry is according that co-

his frank asser,

ils as defeats.

Baltimore Sun

To the youth of the nation, there
are many benefits that will accrue
from this program of training." Dyk-

young men will be in training, they will come to know discipline, not in a harsh, brutal sense, but in a way that will develop character and citizenship.

"Be it Resolved!"

FT. RILEY, Kan.—"Resolved—to serve my country better during 1941!"

Although other New Year's resolutions among soldiers here ranged all the way from a firm determination not to eat more than ten pantion not to eat more than ten pan-akces for breakfast (one breakfast, that is), to the popular resolve not to look cross-eyed at a top-kick; the above expression of "all-the-way" patriotism was the one most frequently heard as this cav post prepared to welcome 1941.

This is Pvt. Frank Brazell

He is 18 years old and not very big. Last August when his outfit, the 121st Engineers, left Washington for training camp, Frank got all excited and happy. It was a swell way to spend the summer.

The call for more National Guard troops has come out again, and during the first half of this month soldiers in all the corps areas except the Ninth will be mustered into Federal service. When he heard about it, Frank looked in all the newspapers for the 121st Engineers, but the number wasn't there. Only one D. C. unit will be called in February.

"Well, next time, maybe," said Frank. He was looking eagerly ahead to another sojourn at camp-a longer one this time, a full -Washington Herald Photo

Slow Responding Nurses Keserve

An immediate and urgent need for gistered nurses for duty with the rmy Nurse Corps Reserve, an imortant component of the rapidly ex-unding Army, is seen as the compleon of many camp and station hos-itals impends this month and in

The War Department estimated riday that during the present sonth 1491 additional nurses will placed on active duty in Army ospitals that will open during the onth. Another large quota will be seded for the hospitals completed a February. Six large Army gental hospitals which will open early a March will require another 760 urses. By June 30, it is planned believe 4019 members of the Army have 4,019 members of the Army lurse Corps Reserve on extended ctive duty.

Source for the Army Nurse Corps eserve in the past has generally een from those registered with the ed Cross. Although 17,000 nurses a available for service in the analysis an emergency, response to questonaires sent out by Corps Area commanders has not been adequate the demands. Service in the a meet the demands. Service in the ameet the demands. rmy Nurse Corps Reserve must be oluntary, and in the past it has ever been difficult to fill quotas. he city

Picked Men get MI Course

FT. MONROE, Va.—Six weeks of training in military intelligence was started by specially selected officers and enlisted men at a new school established here recently. A total of 60 hours of instruction for each student is scheduled.

The course covers military intelligence, camouflage, mapping, target identification and other allied subjects. Selected men from all battery headquarters and lettered batteries stationed here are taking the course.

Classes are held in the West Point Preparatory school building at Ft. Monroe under direction of Maj. Franklin W. Reese, post public relations officer. He is assisted by Capt. George F. Leist, CAC, assistant plans and training officer of the 74th CA (AA).

Similar schools are being held at Ft. Story and Camp Pendleton.

Refrigeration Plants Planned for Camps

Another step to insure a plentiful supply of good food for the expanding Army was announced this week ing Army was announced this week by the War Department with plans to provide 46 cold storage setups in new training centers throughout the

Each unit, of the most modern and efficient design, will provide properly refrigerated storage space and facili-ties for perishable food to supply 12,500 men for four days, 16,500 men not three days, or enough to provide meat, fresh vegetables, butter and such perishable products for the population of a city the size of Daytona Beach, Fla.; Cairo, Ill.; Burbank, Calif.; or Atchison, Kan.

The units will be of reinforced concrete construction. A temperature of 10 degrees will be maintained in the center compartment, while the surrounding space for vegetables and dairy products will be from 35 to 38 degrees. A special enclosed section will be provided for foods which pick up odors.

According to present plans, 18 of the camps will require a single unit, while 22 will necessitate the construction of two units each. Six camps will require three units each. Army camps which will have the new units: (Number of units in parentheses):

I Corps Area: Ft. Devens, Ayer, Mass. (2); Samp Edwards, Falmouth, Mass. (2); II Corps Area: Ft. Dix, N. J. (2); Ft. Monmouth, Red Bank, N. J. (1); Pine Camp, Great Bend, N. Y. (1).

Police and Firemen Get Old Jobs Back, in Army

FORT DIX, N. J.—Policemen and firemen who come to Fort Dix as Selectees will find themselves doing the same work for Uncle Sam they did in civilian life. Officers in charge of military police and fire fighting said they would be used as key men in building up both forces.

Fire Marshal Maj. H. C. Chuck said the incoming firemen would be the basis for the full-strength force of 125 men who will be stationed at the four fire-houses on the post. Already the staff includes 15 men who were volunteer firemen in their home towns before entering the Army.

Two former civilian guardians of the law now in the Army are being detailed to the military police, Maj. William E. McGuire, provost marshal, said. They are Thomas Slattery of the New York City police force and Clarence Hiltebrandt of the New York State police

State police.

Maj. McGuire added that New York
City policemen can be assigned to MP work after a minimum of training because of their preparation for ordinary police work.

Sky Soldiers Line Up at Randolph

EVER SEE a flying cadet without a helmet? And you probably never will. They wear the things to bed. When cadets arrive at Randolph Field, Tex., they've already logged 60 hours' flying time in primary trainers. These men, formed to march to the flying line, face another 75 hours in fast, lowwing monoplanes before they go to Kelly Field for advanced training.

Ft. Bragg Population Grows, Expected to Hit 67,000 in July

FT. BRAGG, N. C .- Population of this post has been constantly on the upgrade since the national defense program got under way. Officials reported that on New Year's Day, 1941, there were 20,001 enlisted men and officers stationed here as compared to 4884 officers and men on Jan. 1, 1940.

But even this great expansion of personnel doesn't bring an end to it. Thousands of Selectees will arrive during the next six months and according to present plans, approxi-mately 67,000 men will be garrisoned here by July 1.

Engineers Receive New Training Equipment

FT. McCLELLAN, Ala. — Belated Christmas gifts in the form of new equipment have been received by the 102d Engineers regiment, 27th Division. A huge gasoline operated, tractor shovel and a baby tractor were part of the new heavy equipment which has been moving in for the engineers from Washington Heights in New York City.

For McCLELLAN, Ala. — Belated to handle the Q-and-A at the "mike," beamed his pleasure and added his fessionals and the former in nearly every instance show a tendency of sag into that awful state of microscopic many producer.

Camp Brings Boom to Gulf Town

PALACIOS, Tex.—The main streets of this once sleepy Gulf Coast

in New York City.

The regiment also received ten 1.800-pound pontoons which, strung together across a river, would make a ten-ton bridge. The shipment also included a portable steel truss bridge, 70 feet long, duckboards and hard rubber rafts, eight motorized compressers to operate neumatic tools, and

sors to operate pneumatic tools, and 30 big trailers to carry pontoons.

Most of the equipment just received, however, is meant for training purposes only, Col. Brendan ing purposes only, Col. Brenda Burns, commanding the 102d, said.

"First Events" Recorded

FT. CONSTITUTION, N. H .- Sev eral "first events" featured two rec-ord service target practices here re-cently. The 22d CA fired its first service practice since its organiza-tion, as did Bat. A. The guns were fired for the first time in 23 years.

Posies O'Keefe Passes

LANGLEY FIELD, Va.-When Lester O'Keefe came to this air base to stage the NBC's Christmas week broadcast on Army life, he brought along his bag of tricks, for how was he to know in advance that Air Corpsmen are—as he puts it—"a strange breed of duckling," who apparantly know nothing about "mikephobia. Talking shop after the 30-minute broadcast "back-stage" in

Chaplain Charles I. Carpenter's office in the Air Base chapel building with excited little knots of officers and men, the crack program producer would mop his brow with a huge handkerchief and chatter amighly with all the and chatter amighly with all the ably with all the men.

"everything "Yes," he agreed, "Yes," he agreed, "everything surely moved along with the smoothness of flowing water." And: "Delighted! Nothing could have been better!" etc. The compliments seemed to pour in from all directions. Jeff Baker, NBC announcer from Norfolk, who came to the field to handle the Q-and-A at the "mike," groups of nonprofessionals and probamed his pleasure and added his pleasure and added his pleasure and added his pleasure and the former in nearly

Then suddenly O'Keefe spoke up with his idea about "mike" fright, "You fellows," he began, glancing about the circle of officers and enlisted men, "simply take to radio broadcasting like ducks take to water. It's your natural, it seems.

phone fright which is so apparent to the listener.

shipped out.

"It is then that the program announcer and producer must rush to the rescue with his bag of tricks; to sort of pump oxygen into the show. But to my astonishment, there was never a moment when I felt like reaching for the needle."

O'Keefe paid special tribute to Maj. Harold L. George, veteran Army flier and racer from Somerville, Mass., who spoke his piece about his racing thrill, according to O'Keefe, with a "nice sense of the dramatic" and with the microphone presence of a

O'Keefe told the Chaplain that he liked particularly well the manner of the Army Air Corps technicians at the microphone. They were all in "good voice," he said, and "talked as if they were eager to impart to the world the most intricate details of their very intricate work."

O'Keefe and his staff went from this station to Ft. Bragg, N. C., where they were to be on the air last night. The Langley broadcast was the second in a series being featured by NBC at Army posts. The first was put on at Ft. Dix, N. J., and the final one is scheduled Mar.

The first was put on at Ft. Dix, N. J., and the final one is scheduled Mar. 14 at Ft. Lewis, Wash.

Among those taking part in the radio show here were: 2d Lt. Carl Andrew Hustad, Army pilot, Minneapolis, Minn.; Staff Sgt. James F. Yoder, weather man, Johnstown, Pa.; Staff Sgt. Roy R. Reisch, trumpet player, Millersburg, Pa.; Staff Sgt. Stanley W. Oliver, traffic man, Carnegie, Pa.; R. L. Flick, towerman, Altoona, Pa.; Maj. Harold George; Capt. H. J. Jenkins, organist, Lewisburg, Pa., and Pvt. A. W. Meell, soloist, Yeadon, Pa. burg, Pa., and Fist, Yeadon, Pa.

Col. Bedinger said approximately 3,000 of the new trainees will be asconstruction would be completed signed to the 44th Division to bring that time.

Dix Will Handle 70,000 T

Trainees in Six Months

FORT DIX, N. J.—Seventy thousand Selectees will be indu into military service at this post between Jan. 6 and June 1 Col. Samuel Bedinger, acting executive officer, announced. In men will come from induction boards in states of the II Corps in New York, New Jersey and Delaware. They will arrive at a reception center at the rate of 500 to 600 a day, five days a w

Since their induction into Federal Service, September 16, the 17 men of the division have been hing in tents. The outfit's new as tonment consists of 825 building each with its own individual show it up to war strength. The others will be sent to organizations at Army posts elsewhere. Trainees will spend five days at Fort Dix before being room and air heating system.

Meanwhile, the recruit center is being prepared to handle the trainee load in accordance with the announced schedule, Lt. Col. Holmes G. Paullin, in charge of recruits, said. 135 Men Commissioned In Air Corps Reserve

Partial bottlenecks in the processing line have been entirely eliminated, he added. Additional specialists have been assigned to the reception cen-ter staff to assure increased ef-A total of 135 young Americans cepted commissions in the Air I serve Corps as of Dec. 28, the W ficiency.

Good news awaits the soldiers of the 44th Division who will learn upon their return from Christmas furlough that the entire division will be moved out of winterized tents and into permanent barracks by Jan. 15. Maj. Gen. Clifford R. Powell, commanding general, made the announcement after receiving assurance from Lt. Col. John R. Tighe, constructing quartermaster, that Department announced this we California led with 21 men liste Texas and Illinois had 16 men end Oklahoma, 15, and New York Other states were represented w quotas of young men that will gi the Air Corps Reserve an increa sectional representation. All of t new men were commissioned as lieutenants.

Former Chief Chaplain Addresses Soldiers At Benning

FT. BENNING, Ga.—Alva J. Ensted of Alexandria, Va., one of the two living former Chief of Chaplain of the U. S. Army, visited Capt and Mrs. L. L. Ingram of Ft. Benning over the week-end. Mrs. Ingram it he daughter of the Rev. Brasted.

The former chaplain now is edi The former cnapiain now is come of the magazine, The Army Chaplain, published by the Chaplains is sociation of the Army of the Units States. Sunday morning he preached to the men of the 4th Div. in the Special Units Hut, later talking to the men of the 24th Div. in the Park the men of the 24th Div. in the Pot Theatre. Sunday afternoon he addressed the Young People's Organization in the Post Chapel, speaking the same evening to a large audience on the subject of "Talents."

while at the Fort, Rev. Braste was interested to hear that the Men Bible Class of Benning was very stive. It is taught every Sunda morning by Chaplain Earl D. Weed post chaplain. The class elect these officers Sunday for the ensuin year: President, Roy H. Orr, 316

Postmaster Gets His Man Jones

HATTIESBURG, Miss.—The effi-ient Army postal service found in its chutes at this camp a letter ad-dressed to Pvt. Jones. After con-siderable "paging" and roll-calling, the missive was delivered to the

"It's for my boy friend-he's a Kitchen Police in the Army."

The Camp PX Is the Soldier's Parlor

BACK IN GRANDMA'S day they used to call it the parlor, or the front room. It had a couple of plush chairs and a spindlylegged gilt one, a chromo or two on the wall and maybe a steel engraving over the tile fireplace. If there was an engraving it was almost sure to be Rosa Bonheur's "Horse Fair." There was a corner stand of bric-a-brac that rattled to beat all, every time a delivery wagon passed in the street.

Grandma kept the room locked against the children most of the time, and it was opened only when "company" came. When Ma took over she called it the "living-room" and removed all the chromos and recovered the chairs with heavy rep. The bric-a-brac was put away in a trunk upstairs.

Well, neither Ma nor Grandma would be able to reconcile the picture above with their own parlor or living room, but to the people

The scene happens to be Camp Ord, Calif., but it could be anywhere in the U.S., any evening of any day. Artist Davis has caught everything here, from the C.O.'s warning tacked up over the counter to the ever-present M.P. If you look closely you can see the harried newsboy in the background, probably tracking down a private who said his name was Smith, and who owes him for papers from five

There's a juke box playing "Beat Me, Daddy-Eight to the Bar," a pot-bellied stove (because it gets chilly on the Monterey Peninsula these January nights), and lots of chairs because a feller likes to sit down when he gets a chance. Best of all, there's good brown ale in squat brown bottles.

The PX at Ord is a big one and it sells everything from Housewives to traveling bags. Keeping accounts on all these items is a man-sized job. The exchange officer comes around daily, checks in the receipts and carries them off to the bank.

Offhand, we can't think of a case on record of the money being sidetracked on its way to the bank. Maybe the two guys flanking the officer are the reason for that. They look like a plenty good reason from where we're sitting.

Crack Shots in the Making

CAMP McQUAIDE, Calif.—Marksmen, sharpshooters and experts are in the making at this Army post. Last week members of the 250th CA were out in the field putting into practice what they had learned the week before in rifle firing lessons.

The men were given three days' instruction in the handling of the Springfield 1906 model rifles by Lt. William A. Hancock, captain of the camp pistol team, and@

Now they're bent on making their of scoring. that is necessary to know for attain-ing at least fair marksmanship, in-cluding details of a rifle and methods own time.

York | ted w will g

lain

Now they're bent on making their commanding officer's wish come true. He, Col. David P. Hardy, wants every member of his regiment to know all that is processed by the control of the command of the comm

US Engineers Move In

WESTOVER FIELD, Mass .- U. S. Army Engineers, under supervision of Col. John S. Bragdon, have moved in to take charge of all further conin to take charge of all further construction at Westover, the constructing QM being relieved. The move was in line with the War Department's recently announced plan to place construction work at all Air Corps centers in charge of the USE's.

During last week's firing the men were attempting to qualify for marksmen, sharpshooters and experts. One hundred and forty-seven hits out of 200 brands a shooter as a marksman, 160 as sharpshooter and 173 as expert.

Army Leases School For 6th Corps Hqrs.

Ft. Bragg Population Grows, Expected to Hit 67,000 in July

FT. BRAGG, N. C .- Population of FT. BRAGG, N. C.—Population of this post has been constantly on the upgrade since the national defense program got under way. Officials re-ported that on New Year's Day, 1941, there were 20,001 enlisted men and officers stationed here as compared to 4884 officers and men on Jan. 1, 1940.

But even this great expansion of personnel doesn't bring an end to it. Thousands of Selectees will arrive during the next six months and according to present plans, approxi-mately 67,000 men will be garrisoned here by July 1.

Engineers Receive New Training Equipment

FT. McCLELLAN, Ala. — Belated Christmas gifts in the form of new equipment have been received by the 102d Engineers regiment, 27th Division. A huge gasoline operated, trac-tor shovel and a baby tractor were part of the new heavy equipment which has been moving in for the engineers from Washington Heights

in New York City.

The regiment also received ten The regiment also received ten 1,800-pound pontoons which, strung together across a river, would make a ten-ton bridge. The shipment also included a portable steel truss bridge, 70 feet long, duckboards and hard rubber rafts, eight motorized compressors to operate pneumatic tools, and 30 blg trailers to carry pontoons. Most of the equipment just received, however, is meant for training purposes only, Col. Brendan Burns, commanding the 102d, said.

"First Events" Recorded

FT. CONSTITUTION, N. H.-Sev eral "first events" featured two rec-ord service target practices here re-cently. The 22d CA fired its first service practice since its organiza-tion, as did Bat. A. The guns were fired for the first time in 23 years.

Posies O'Keefe Passes

LANGLEY FIELD, Va.-When Lester O'Keefe came to this air base to stage the NBC's Christmas week broadcast on Army life, he brought along his bag of tricks, for how was he to know in advance that Air Corpsmen are—as he puts it—"a strange breed of duckling," who apparantly know nothing about "mikephobia." Talking shop after the 30-minute broadcast "back-stage" in

Chaplain Charles I. Carpenter's of a fice in the Air Base chapel building with excited little knots of officers and men, the crack program producer would mop his brow with a huge handkerchief and chatter aminably with all the men. ably with all the men.

ably with all the men.

"Yes," he agreed, "everything surely moved along with the smoothness of flowing water." And: "Delighted! Nothing could have been better!" etc. The compliments seemed to pour in from all directions. Jeff Baker, NBC announcer from Norfolk, who came to the field to handle the Q-and-A at the "mike," beamed his pleasure and added his congratulations to the others piling in on the producer.

broadcasting like ducks take to water. It's your natural, it seems.

"Every last one of the officers and men who made up the program did his part like seasoned professionals and that, too, with a minimum of refersion." In my years of producing shows for the air I have worked with many congratulations to the others piling in on the producer.

Then suddenly O'Keefe spoke up with his idea about "mike" fright. "You fellows," he began, glancing about the circle of officers and enlisted men, "simply take to radio broadcasting like ducks take to water. It's your natural, it seems.

phone fright which is so apparent to the listener. "It is then that the program an-

load in accordance with the announced schedule, Lt. Col. Holmes G. Paullin, in charge of recruits, said.

Partial bottlenecks in the processing line have been entirely eliminated, he added. Additional specialists have

been assigned to the reception cen-ter staff to assure increased ef-

shipped out.

nouncer and producer must rush to the rescue with his bag of tricks; to sort of pump oxygen into the show. But to my astonishment, there was never a moment when I felt like reaching for the needle."

O'Keefe paid special tribute to Maj. Harold L. George, veteran Army flier and racer from Somerville, Mass., who spoke his piece about his racing thrill, according to O'Keefe, with a "nice sense of the dramatic" and with the microphone presence of a

O'Keefe told the Chaplain that he liked particularly well the manner of the Army Air Corps technicians at the microphone. They were all in "good voice," he said, and "talked as if they were eager to impart to the world the most intricate details of their very intricate work."

O'Keefe and his staff went from this station to Ft. Bragg, N. C., where they were to be on the air last night. The Langley broadcast was the second in a series being featured by NBC at Army posts. The first was put on at Ft. Dix, N. J., and the final one is scheduled Mar. and the final one is scheduled Mar.

14 at Ft. Lewis, Wash.

Among those taking part in the radio show here were: 2d Lt. Carl

Among those taking part in the radio show here were: 2d Lt. Carl Andrew Hustad, Army pilot, Minneapolis, Minn.; Staff Sgt. James F. Yoder, weather man, Johnstown, Pa.; Staff Sgt. Roy R. Reisch, trumpet player, Millersburg, Pa.; Staff Sgt. Stanley W. Oliver, traffic man, Carnegie, Pa.; R. L. Flick, towerman, Altoona, Pa.; Maj. Harold George; Capt. H. J. Jenkins, organist, Lewisburg, Pa., and Pvt. A. W. Meell, soloist, Yeadon, Pa.

Col. Bedinger said approximately 3,000 of the new trainees will be asconstruction would be completed signed to the 44th Division to bring that time.

Trainees in Six Months

FORT DIX, N. J.—Seventy thousand Selectees will be indu into military service at this post between Jan. 6 and June 1,1 Col. Samuel Bedinger, acting executive officer, announced, men will come from induction boards in states of the II Corps An -New York, New Jersey and Delaware. They will arrive at a reception center at the rate of 500 to 600 a day, five days a we

Since their induction into Feder service, September 16, the 17m men of the division have been hing in tents. The outfit's new ca-tonment consists of 825 building each with its own individual shore it up to war strength. The others will be sent to organizations at Army posts elsewhere. Trainees will spend five days at Fort Dix before being Meanwhile, the recruit center is being prepared to handle the trainee room and air heating system.

135 Men Commissioned In Air Corps Reserve

A total of 135 young Americans a cepted commissions in the Air b serve Corps as of Dec. 28, the Wa ficiency.

Good news awaits the soldiers of the 44th Division who will learn upon their return from Christmas furlough that the entire division will be moved out of winterized tents and into permanent barracks by Jan. 15. Maj. Gen. Clifford R. Powell, commanding general, made the announcement after receiving assurance from Lt. Col. John R. Tighe, constructing quartermaster, that Department announced this we California led with 21 men listet Texas and Illinois had 16 men eac Oklahoma, 15, and New York Other states were represented w quotas of young men that will gin the Air Corps Reserve an increa sectional representation. All of t new men were commissioned as lieutenants.

Former Chief Chaplain Addresses Soldiers At Benning

FT. BENNING, Ga.—Alva J. Busted of Alexandria, Va., one of the two living former Chief of Chaplain of the U. S. Army, visited Capt and Mrs. L. L. Ingram of Ft. Bennia over the week-end. Mrs. Ingram it daughter of the Rev. Brasted.

The former chaplain now is edi of the magazine, The Army Chaplain, published by the Chaplains as sociation of the Army of the Unite States. Sunday morning he preached to the men of the 4th Div. In the Special Units Hut, later talking in the men of the 24th Div. the men of the 24th Div. in the Por Theatre. Sunday afternoon he addressed the Young People's Organization in the Post Chapel, speaking the same evening to a large audience on the subject of "Talents."

While at the Fort, Rev. Brasie was interested to hear that the Men Bible Class of Benning was very we tive. It is taught every Sunday morning by Chaplain Earl D. Weed post chaplain. The class elected these officers Sunday for the ensuing year. President Roy H. Orr. 31 year: President, Roy H. Orr, 3ti Ord Co.; VP, William Hewitt, Bak ers and Cooks School; Secy., Glem A. Jarrett; Vice-Secretary, F. A. Trower, 1st Training Btn.; Tress urer, Edward T. Ensor, Chem. Ref.

Col. R. O. Miller Dies At Walter Reed

Lt. Col. Raymond O. Miller dle December 29 at the Walter Reed Ho pital, Washington, D. C. He was but ied with full military honors in Arlington National Cemetery.

Colonel Miller was awarded the Silver Star for gallantry in action in the Vosges Sector, France.

He

Camp Brings Boom to Gulf Town

PALACIOS, Tex.-The main streets of this once sleepy Gulf Coast village of 2300—now boasting a population of 12,000 with the advent of Army camp followers—resembles the thoroughfares of an oil boom

It all has happened in about two months. Palacios is the site of Camp Hulen, formerly used as a Texas National Guard encampment but now occupied by Coast Artillerymen from Massachusetts.

Take a stroll down the streets of Palacios of 1941 and here is what

Shooting galleries on both sides of the streets, and lunch and cold drink establishments going up on every hand.

There, the headquarters of a now thriving Chamber of Commerce,

here a new store or dance hall.

To the left and to the right, trailers, coaches, cars and trucks bearing carpenters, mechanics and laborers coming to the town. Everywhere, new houses and tents springing up to shelter floaters and boom

In the alleys and at the edges of the town, more gas, water, light and sewer lines being built. In the heart of the business district, a new post office rising. New shows, skating rinks, bowling alleys, cafes and shore dinner resorts.

At Camp Hulen, about three miles from town, barracks and builds now replace the skeleton tents of the National Guard. Recruits

'Y' Opens Its Doors to Army

Dedication exercises took place in lain and chaplain of the Fourth Dithe new dormitory on the second floor of the Columbus Army & Navy

An unusual but meaningful part

An unusual but meaningful part

of the program took place when made last week-end by 4000 men of rmcA on Sunday, Dec. ZZd, as a feature of the "open house" program from 9 in the morning until 9 at night. With a capacity of 75 beds, each equipped with a large metal locker at the foot, the dormitory is a fine addition to the building, and won the approval of the large crawd. YMCA on Sunday, Dec. 22d, as a fea won the approval of the large crowd of Army men and citizens from sur-rounding communities who attended the dedication program. Music was furnished by the 67th

Music was furnished by the 67th Armored Regiment's orchestra, under the direction of Pvt. 1st Class Martin L. Bellman. Soloist of the afternoon was Pvt. Willie Joe Caldwell, Co. F of the 67th Armored Regiment, who was accompanied by Pvt. Kemp at the field organ. Chairman Edward W. Swift of the Committee of Management presided. Greetings were extended by Mayor Edward Murrah with response by Chaplain. Earl D, Weeks, post chap-

Chairman T. G. Reeves of the county commissioners presented the keys to the dormitory to one of the Army men in the audience who in turn threw them away, signifying the YMCA doors will never be locked again. This traditional part of the YMCA dedication service has taken place in each of the 48 Army & Navy Y units in this country and at foreign posts as an indication of the 24-hour service continually available and the welcome that always awaits a man in uniform.

ALEXANDRIA, La. - Sightseeing the 32d Division who did not go to their Wisconsin and Michigan homes for the holidays. The troops bivoucked at the New Orleans Fair Grounds. Making the trip in Army Grounds. trucks, the soldiers saw the town "at no formal tours being sched-

Postmaster Gets His Man Jones

HATTIESBURG, Miss.-The efficient Army postal service found in its chutes at this camp a letter addressed to Pvt. Jones. After considerable "paging" and roll-calling, the missive was delivered to the

"It's for my boy friend-he's a Kitchen Police in the Army."

The Camp PX Is the Soldier's Parlor

BACK IN GRANDMA'S day they used to call it the parlor, or the front room. It had a couple of plush chairs and a spindlylegged gilt one, a chromo or two on the wall and maybe a steel engraving over the tile fireplace. If there was an engraving it was almost sure to be Rosa Bonheur's "Horse Fair." There was a corner stand of bric-a-brac that rattled to beat all, every time a delivery wagon passed in the street.

Grandma kept the room locked against the children most of the time, and it was opened only when "company" came. When Ma took over she called it the "living-room" and removed all the chromos and recovered the chairs with heavy rep. The bric-a-brac was put away in a trunk upstairs.

Well, neither Ma nor Grandma would be able to reconcile the picture above with their own parlor or living room, but to the people in it, it's home.

The scene happens to be Camp Ord, Calif., but it could be anywhere in the U.S., any evening of any day. Artist Davis has caught everything here, from the C.O.'s warning tacked up over the counter to the ever-present M.P. If you look closely you can see the harried newsboy in the background, probably tracking down a private who said his name was Smith, and who owes him for papers from five

There's a juke box playing "Beat Me, Daddy-Eight to the Bar," a pot-bellied stove (because it gets chilly on the Monterey Peninsula these January nights), and lots of chairs because a feller likes to sit down when he gets a chance. Best of all, there's good brown ale in squat brown bottles.

The PX at Ord is a big one and it sells everything from Housewives to traveling bags. Keeping accounts on all these items is a man-sized job. The exchange officer comes around daily, checks in the receipts and carries them off to the bank.

Offhand, we can't think of a case on record of the money being sidetracked on its way to the bank. Maybe the two guys flanking the officer are the reason for that. They look like a plenty good reason from where we're sitting.

Crack Shots in the Making

CAMP McQUAIDE, Calif.—Marksmen, sharpshooters and experts are in the making at this Army post. Last week members of the 250th CA were out in the field putting into practice what they had learned the week before in rifle firing lessons.

The men were given three days' instruction in the handling of the Springfield 1906 model rifles by Lt. William A. Hancock, captain of the camp pistol team, and

Now they're bent on making their of scoring.

Civilians Plan Sewage Help For Army

The problems of sewage disposal in Army camps now under construction are to be turned over to civilian contractors, the War Department announced this week. Negotiations are under way with two engineering firms, Metcalf & Eddy of Boston, and Greeley & Hansen of Chicago, to study, plan and make recommendations for sewage treatment.

Under the contract the consultants will make visits to the projects as

will make visits to the projects as frequently as their development makes it necessary. They will confer with Constructing Quartermasters and Architect-Engineers, prepare re-ports and make recommendations for sawage treatment for various conditions which may be encountered.

The project embraces 38 canton-ments, located in 23 different states

Legislator Trains at Guns

BEHIND THIS GUN, right foreground, stoops Pvt. S. Rhea Haskell, of the 118th Infantry at Fort Jackson, S. C. He's just "one of the boys" to his buddies, but in civil life he's a politician and a legislator. He was elected to the State House of Representatives last August and will be back at that post after his tour of military duty is over.

Cape Henlopen Dunes Are Site for Bombing Practice

LEWES, Del.-The bleak, isolated | ment surveyors are on the job lining sand dunes of Cape Henlopen have been selected by the Army as a strafing and bombing field for training its pilots. Already bombers and pursuit ships have moved in, dropping practice bombs in the surf, and the loudest complaints have come from sea gulls who no longer can filch a breakfast of mackerel without getting their tails blasted off.

The Army is not content with what it has out here. Its eyes are on some 1,500 acres of dunes, and War Depart-

Pastor, Teacher Sentenced for **Draft Evasion**

PORTLAND, Ore.-Convicted for failure to register for Selective Service, Rev. Paul R. Ackermann, Methodist minister, and Edwin A. Sanders, English instructor at Pacific College, Newberg, have been sentenced to serve one year in a road camp.

Federal Judge James R. Fee, at the time of sentence, issued a stern warning to persons who had written letters to the court asking leniency in behalf of the defendants.

Both of the men convicted made Both of the men convicted made lengthy statements outlining their views and reasons for not registering. They based their attitude on religious convictions, Sanders being a Quaker. In pronouncing sentence, Judge Fee said he looked upon Rev. Ackermann's case as a national "sounding board" on draft evasion

Benning Opens Own Draftsman School

FT. BENNING—A school for draftsmen, instituted by Fort Benning's 4th Division, will commence Jan. 13, 1941, and terminate Feb. 8.

Two enlisted men from each bat-talion headquarters and headquar-ters company in the division will be selected. The students must have the equivalent of a high school educa-tion and show special aptitude and talent for drawing.

Capt. Lawrence E. Haws will be in

charge, assisted by 1st Lt. Edward L. Bonney.

up sights on about four miles of shore line. Right in the middle of the desolate

dunes stands a handsome three-story building which houses a surf club. At one time it was a Coast Guard Station, but the government sold it. Now the Army wants to take it over again as officers' living quarters. The club is spacious, with plenty of bedrooms, lounge, recreation rooms and even a large ballroom.

The Army considers this an ideal spot for pilots' quarters and for other Army men who could watch the sea from the club's towers which com-mands a view from the mouth of the Delaware breakwater of ships heading up the Delaware River to Phila-delphia.

And right across the bay, just a

And right across the bay, just a mile and a half away, is the Cape May Naval Air Training Station. This set-up would quickly discourage any enemy invader which might be inclined in wartime to reach Philadelphia by ship.

For the present, however, the only discouraged person about the whole business is the manager of the surficiub. He says people won't come to the bay to fish in the summer with all those bombers and machine guns so close by. Besides, falling bombs and dive bombers don't sound inviting to fish.

Selfridge Group Claims Endurance Record

The endurance record for any similar outfit is claimed by the 31st Pursuit Group, stationed at Selfridge Field, Mich. This Group has com-piled a total flying time of eight years, nine months, or 76,033:35 hours for all flyers in the organiza-

hours for all flyers in the organization.

Commanded by Lt. Col. Harold H. George, one of the few remaining World War "Aces" in the Air Corps, the 31st Pursuit Group has been steadily piling up flying time during its intensive training program.

Colonel George, the oldest flyer in the Group, has been flying for more than 23 years. Major J. R. Hawkins has the most individual time for any pilot in the Group, with a total of 5,106:25 hours.

The roster includes 34 pilots who have been flying only 18 months, including 9 months spent at the Air Corps Training Center. The least amount of time of any indi-

least amount of time of any indi-vidual pilot of the unit is 405 hours.

30-Day Refresher for N. Y. Guard Officers

letter was then read by the com-ding officer commending Sgt. les Rinker of Co. B for his work a convoy from Ft. Benning to Knox, Ky., and return. ter the award of trophies, Maj.

BENNING, Ga.—Recruit 'em. Grener greeted the recruits and ex-em, induct 'em—and there's the plained what was to be expected of them when they were turned over to Grener greeted the recruits and ex-plained what was to be expected of them when they were turned over to the companies. Lieutenants Monahan and Johnson, the officers in charge of the recruit detachment, were com-mended for their excellent work as recruit instructors.

The recruits had completed an in-The recruits had completed an intensive training course of four weeks. This instruction has included military courtesy, first aid and hygiene, close order drill, calisthenics, preliminary firing with pistol, rifle, and machine guns, as well as other basic military training.

Following the induction address, the recruits were marched by noncommissioned officers to the companies to which they had been assigned. Seventeen men went to Co.

panies to which they had been assigned. Seventeen men went to Co. A, 21 to Co. B, 10 to Co. C and 9 to Co. D.

When the recruits had taken their places in the ranks, the whole battalion passed in review to the martial music furnished by the 67th Armored Regt. Band. The recruits made a Regt. Band. The recruits made a good showing side by side with the more seasoned troops and it was apparent that they are on their way toward upholding the high standards being set by the 2d Recons. Battalion.

Benning's Holiday Fun **Includes 3 Dances**

FT. BENNING, Ga. — The holiday social season at this post was cli-maxed by three dances for enlisted men and their ladies. Cottie Clark and her Atlanta Georgettes, widely-known girl orchestra, diffused the rhythm for a ball on the evening of Dec. 28. A New Year dance was the recreation department's specialty New Year's Eve.

Schools for Soldiers Too

units, of course, spend the greater part of their time in training instruction and are often detailed as instructors in post schools. But besides these normal duties, about one Regular officer out of six is on full-time duty as an instructor either at an Army or Organized Reserves.

Duty as an instructor is usually for

Before he is qualified for a higher rank, a Reserve officer must complete certain Army extension courses. These are correspondence courses prepared at the Army schools mainly to enable Guardsmen and Reservists to increase their military knowledge.

Schools for Soldiers Too

But the schools for officers by no means form the whole of the Army's educational system. There are many special service schools for enlisted men. There are also schools of several kinds conducted on every Army post, and in the National Guard and Organized Reserves for both officers and enlisted men.

In the periods between their at-

21. The Army's Schools

Duty as an instructor is usually for a period of four years. Many officers on such duty also have charge of the work of extension course students in their localities. The instructors at the Command and General Staff School and the schools of the arms and services prepare the textbooks and lessons of the Army extension courses.

Later chapters will deal in greater detail with the different schools and types of instruction in the Army of the United States.

Sports Flourish in War-Taut Philippines

Despite war and threats of war, two, proceeded to take another beat-rumors of hostile gunboats raiding ing, from the 12th Med. Corps, 38 to deep in Pacific waters, and long fingers of a strong Asiatic power reach-ing out toward the Philippines, American troops take their sports as they find them.

the Philippine station have a plenti-ful recreational menu from which to select: duckpins and ten pins for bowling; swimming, boxing, softball, basketball, polo, golf, and just about every other form of athletics and competitions that can be named.

BASKETBALL

The Stem care loop of the Scouts

The 8-team cage loop of the Scouts Division offers the highlight of sports in fast and furious competition. The lead has changed hands three times, and latest reports say any team in the first division is in

any team in the first division is in a position to cop the crown.

The 45th Infantry got off to a fast start, winning the first five games of the tourney, tossing the crumbs of second place to three clubs, the 24th FA., the 92d CA., and the 91st CA.

As play developed, the second-place tle cracked when the 91st spiked the cannoneers' guns, and then spilled over the league leaders themspilled over the league leaders themselves. Then the 14th Engrs., coming from fifth place, tripped the 57th Inf. 49 to 32, following up with a thrill-packed upset of the wagon soldiers, 43 to 42, which brought the Engrs, into third place.

Meanwhile the 91st CA, holding tenaclously to the second spot, defeated the artillerymen 49 to 47, the 57th Inf. 64 to 37; only to lose their grip as the Engrs, trounced them to the tune of 44 to 38.

With those hard-won scalps under

With those hard-won scalps under their belts, the scrapping engineers found some help when the artillery quintet deposed the top-ranking 45th Inf. 75 to 21, and the 57th Inf. whip-ped their brethren doughboys 49 to 40, letting the Engrs. slip into the league lead.

The 45th Inf., now in a tie for second place with the 91st CA, both clubs having won seven and dropped

37, spilling them clear down into the fourth spot.

Thereupon an inspired 91st team copped two tilts, one from the 26th Cav., and one from the 24th FA, to climb to the top of the ladder

as the season draws to a close.

In the American Division, Nichols Field won 'its third contest by defeating Clark Field 33 to 22, and dropped one to the 60th CA, 33 to 24, and another to the 59th CA, 34 to 17.

SOFTBALL
The McKinley ten continued their

In the recent inter-battery smoker, staged by the 60th CA, Livingston of D outpointed Fessler of C Battery. Forehand (HQ) took a decision over Faeo (B), Klein (HQ) took the nod over Merrifield, Willington (D) won from Mull (E).

Other decisions: English (HQ) won from Holik (B); McQueeny (C) over Chisholm (Med.); Russell (HQ) won from Ahern (Med.),

BOWLING
The 45th Infantry took most of the honors, winning its third pennant of the year, in the post ten pin tour-nament for enlisted men. Taking 25 grip on first place, winning 6 and losing 1, as the second-place Nomads lost the opportunity to even things up when they dropped a 5 to 4 session to the fourth place Whites.

(Fernandez), 618 pins.

The 57th Inf. placed second, 23 wins and 7 defeats; Special Units third, winning 20 and losing 10; fourth, 14th Engrs, 11 wins and 19 losses; 12th Med., fifth, winning 9 against 21 defeats, and the 12th QM, last, with only 2 victories in 30 starts.

starts.

The commissioned personnel of the 45th held up their end for regimental honors when they finished first in the 4-team loop for officers. It was tougher going for them than it was for the enlisted men, for the Special Units bowlers were hard on their beels. The doughboys won 20 games against 10 losses, with the Special Units droping 11 games and taking 19. Major Guevsra, 45th Inf., led with an average of 173.16, with second hones going to his beather.

with an average of 173.16, with second honors going to his brother officer, Capt. R. V. Strauss, 163.12.

The 14th Engrs. finished 3d, with the 57th Inf., in the cellar position.

Mine-Training Area ls Studied by Army Officers

Plans for establishment of a minetraining zone on a permanent reservation of two-square miles of water area off the southwest tip of Sandy Hook are being studies by Army and Navy officials.

Purpose of the proposed action, ex-pected to come to a head within a pected to come to a head within a few weeks, is to provide a specific training area in harbor water for the enlarged Army personnel engaged in mine-laying work. Maj. J. M. England, 7th CA, in charge of the mine command in the Ft. Hancock area, appeared in Washington over the weekend to recommend the recommend. week-end to recommend the reserve establishment. Army engineers have the plan under advisement.

At present, the Army is forced to select the most available sea area for its mine-laying practice, officers pointed out. Because of the frequent shifting of these activities, a hard-ship is worked upon shippers and the Army itself, it was added. Establish-ment of a permanent training area would solve the present problem, officials believe.

New Bomber at Chanute Field

CHANUTE FIELD, III. - Arrival here of another Douglas A-20, the Air Corps' newest warplane, has been an-nounced by Maj. O. L. Rogers, post operations officer.

The ship is a twin-engined light bomber with tricycle landing gear. It was ferried from the Douglas branch factory at El Segundo, Calif., by Lt. H. G. Crank.

tion Army headquarters here said a second Red Schield Club will be ened soon in Junction City, Kan., for the men at Ft. Riley.

Edwards Men Broadcast

CAMP EDWARDS, Mass .- A fea ture of the Christmas Eve activities here was an Army broadcast, arranged by Capt. James E. Regis and Chaplain John K. Connely, over the Colonial Network. Participating were four bands, two choruses and a number of speakers.

On Christmas Eve at Ft. Niagara, N. Y., a party was held for the post children. Three short movies were shown, songs were sung and a Santa Claus handed out gifts. About half

Claus handed out gifts. About half of the garrison took holiday leave. At Plattsburg, N. Y., about 350 enlisted men received holiday furloughs. Col. and Mrs. Muir visited the messes of all companies during the Christmas dinner and also visited the messes of all companies during the Christmas dinner and also visited the patients in hospitals. There was a large post Christmas tree and this was the center of a party for children on Christmas Eve. New York men received Christmas packages from the friends of New York Soldiers and Sailors, Inc.

Ft. Slocum, N. Y., soldiers remaining in camp during the holidays joined in a Yuletide party for themselves and the post children. Holiday activities included free movies, soccer games, and church activities.

Boys Can Take It. Says Gen. White

CAMP MURRAY, Wash .- They have what it takes—the young men of America now in training camps or headed that way—in the opin-ion of Maj. Gen. George A. White, commanding the 41st Division.

"The thousands of young men who have joined the colors during the last few months have spirit and enthusiasm for their training," the commanding general declared. "Living under rather primitive conditions during the winter weather, they not only refuse to complain, but maintain a high morale as they work long hours each day in the hard business of training toward the goal of real efficiency." the goal of real efficiency."

General White said the showing

being made by the youths coming into the training camps should "cause some embarrassment to those who have been preaching that the younger generation could not take it."

Army to Exhibit Equipment

A regional conference of State Defense Councils was recently held at New Orleans, attended by repre-sentatives from Mississippi, Louisi-ana, Alabama, Georgia, Florida, North Carolina, South Carolina, Arkansas, Oklahoma, and Texas. The Secretary of War was represented at this most Oklahoma, and Texas. The Secretary of War was represented at this meeting by Col. Kemper Williams of the Morale Division of the Office of the Adjutant General. The Advisory Commission of the Council of National Defense was represented by Mr. Frank Bane. The conferees discussed the means of arranging community cooperative programs to provide for adequate welfare and recreation facilities in the communities adtion facilities in the communities adjacent to the military installations in those states.

One of the problems discussed was that of providing housing facilities at reasonable rentals for the dependents of officers and enlisted men of the or officers and enlisted men of the Army. The representatives of the various states were all in accord with the views of the War Department that a helpful moral atmosphere should be maintained in the communities adjacent to military activities and that every effort should be made to prevent rent profiteering.

Sgt. Father Has To Salute Lt. Son

ST. LOUIS, Mo.-"Dad, you'll have to salute me," said William Schneider, Jr., just commissioned in the Army Air Corps at Randolph Field, Tex., as he arrived here the day before Christmas.

The father, Sgt. William Schneider, who recently was inducted into the Army with the Missouri National Guard, looked up as he felt the son slap his back, grinned, and saluted.

Gen. Danford, F.A. Chief. On Inspection Tour

The War Department announced that Major General Robert M. Danford, the Chief of Field Artillery, and Lt. Colonel Rex W. Basley of his office left December 26th, for Fort Bragg, North Carolina, to witness tests of the new three-man Quarter-Ton Truck (4 x 4) and other Quarter-Ton Truck (4 x 4) and other field artillery automotive material now under test by the Field Artillery Board. If these small Four-Wheel-Drive Trucks prove successful in their field tests, it is contemplated that they will be substituted for motorcycles with side cars for tactical operations of the Field Artillery. Other using services are also conducting tests of these trucks.

Half Million Specialists Register for Defense

"The objective," Doctor Carmichael said recently in a speech before the American Association for the Advancement of Science, "is to have a complete register in Washington of all American scientists together with full data on their specialties, qualifications and availability for Government service." ment service.

ment service."

Already, he said, there have been many calls for specialists. About 200,000 questionnaires have been sent out. Chemists alone received more than 44,000. In addition to these, other specialist groups are compiling their own registers.

When the questionnaires are filled

PHILADELPHIA — Butchers and bakers and candlestick makers, in fact practically every trade or profession known to man, have some place in the modern Army or in auxiliary defense measures. The only problem is to select the right person for the right job.

To enable the government more quickly to make the proper selections, a registration of civilian specialists is in progress, conducted from Washington. Dr. Leonard Carmichael, president of Tufts College, is directing the work.

"The objective," Doctor Carmichael ers. Cards are sorted by the new machine to enable rapid selection of the individual for the duty he is best fitted.

Flyers, too, came in for comment. A million civilian pilots, capable of flying 50-horsepower planes with large wingspreads and slow landing speeds is a goal of the Civil Aeronautics Authority in the next few years, it was revealed by Dr. John G. Jenkins, professor of psychology at the U. of Maryland and head of sent out. Chemists alone received more than 44,000. In addition to these, other specialist groups are compiling their own registers.

When the questionnaires are filled out and returned, they are put through a new type of machine for sorting and classification. Completely

Soldiers Back At Reveille **Thursday**

New Year feasting and relaxation blacked out any possibilities for homesickness among the men in Army camps and stations throughout the nation Wednesday as the calen-dar clicked its farewell to Leap Year.

Furloughs and holiday activities came to an end at reveille time Thursday, and from then on normal Thursday, and from then on normal training routine was resumed with men working under the annua handicap of a Yuletide fullness brought on by plain and fancy stuffing of victuals. These included large helpings of turkey, ham, ice cream, ple and all the supporting dishes that usually go to make up a New Year feast. Year feast.

The men in camp had an opportunity to burn up some of the rich food by engaging in sports at their leisure but most of the boys preferred to loll around their quarters, or relax at shows and other entertainments.

Youths Who Learned What's in a Name Are Now in Army

MILWAUKEE, Wis.—Here's the sequel to the week-old story about an under-age volunteer getting into the Army on a friend's name. In a nutshell, the Army kept the ambitious boy and now has taken in the youth whose name was misused, and events the state of whose name was misused, and everybody's happy.

The underage boy, Harry W. Whol-fiel, Jr., 15, used the name of his pal, Joseph Bezak, 19, and later confessed, only to be forgiven by Uncle Sam after he had told draft officials "a discharge would break my heart."

Now Bezak, whose enlistment had been held up until he could pass a physical examination, has made that hurdle. But the pals will not serve together as Wholfiel is a Camp Custer and Bezak is headed for the Panama Canal Zone.

One, Doctor Jenkins described, consists of two small crystal microphones attached to the chins of both students and instructor and wired to a short-wave transmitter. By this means all conversation between the can be recorded on the ground and analyzed by psychologists.

Another device is a "stick" handle in the form of a stiff rubber ball which will register automatically the pressure applied to it. This is a rough measure of "tension." The more tense a man, it is generally agreed, the poorer material he is for iviation.

Plans are also being studied to attach a voltmeter to students during flight, which will give a more direct measure of tension.

new commandant has been serving as instructor in the Tactics Depart-ment at the Academy.

Col. Irving was born at Taunton, Mass., and was graduated from the Military Academy in the class of 1917. During the World War he served in France with the 5th Div. and was decorated for extraordinary beroism, receiving the Silver Star.

heroism, receiving the Silver Star and Purple Heart for his fighting in the St. Miheil Mihiel offensive, in which he was wounded.

Col. Ryder was born at Topeka, Kan., and was graduated from the Military Academy in 1915. During the World War he served in France with the 16th Inf. For extraordinary

heroism in action he was awarded the DSC, the Silver Star, the Purple Heart, Croix de Guerre, French Le-

gion of Honor and Fourragere. He was wounded in action near Sois-sons, July 21, 1918.

STANDARD MILITARY BOOKS

Every Officer and every Soldier should have a modest library of Military Books. They provide a guide for him, in that he may read up on the things that are included in the Training Schedules and that is bound to make the work more interesting. In many instances they serve to help him over the rough spots and make the him over the rough spots and make the going easier. Here are a few that we can recommend to you.

ARMY MESS MANAGEMENT SIM-

Tells you exactly how to run an Army Mess, give your men superior food and keep within the ration al-

BASIC INFANTRY TACTICS ... A fine line of information on prac-tically all of the Subject included in the Infantry Training Program.

COMPANY ADMINISTRATION ... This is your Service Bible. If there is any book to be included in "Must" category it is Company Administration. Army paperwork illustrated and your administrative problems solved for you.

ESSENTIALS OF INFANTRY TRAIN-Indispensable to infantry officers and highly desirable for all officers. You must all know how the Doughboy goes about his work of fighting the enemy on the Battlefield.

INFANTRY DRILL REGULATIONS ... \$.50 In addition to the complete text of the Infantry Drill Regulations this edition of the book includes besic texts on Rifle Marksmanship; (Springfield and Garand Rifles); Military Discipline, Courtesies and Customs of the Service; Interior Guard Duty; and The Infantry Pack and Equipment.

INFANTRY IN BATTLE ... Brand new and up to date. Treats of the tactics of Small Units . . . just the thing that the junior of-ficer, Noncommissioned officer and soldier must know about.

and Equipment.

MACHINE GUNNER'S MANUAL \$2.25 Every Line Officer must have a knowledge of Machine Gunnery. He never knows when he may be assigned to a machine gun outlet, In war, any ady he may come into possession of a machine gun that, if he knows how to use effectively, may save the day in combat.

MAP READING AND SKETCHING \$1.35 You "Must" know how to read a military map and how to interpret an aerial photograph. A lot may depend on it in battle. This book sets forth, briefly and simply all that the Army has learned on these

years.

Provides you with complete and detailed information on the subjects that enter into the daily life of an officer on active service. Writtin by distinguished officers of the Army who have had long experience—men who know what they know and know that they know it.

THE OLD SERGEANT'S CONFER HE OLD SERGEANT'S CONFFI-ENCES

One of the most valuable soldier books ever published. In its pages the Old Sergeant tells the young soldier the things he'ought to know—the things that will help him to evoid many of the pitfalls of the service, and make the going easier for him.

Completely revised and brought up to date. Convenient pocket size. Covers the whole range of soldier life and soldier training. Every soldier in the Army, officers and men should have a copy of this great book in his kit, Include a copy with your order.

Spider Spins Heart Out for Defense

BATEMANTOWN VILLAGE, O. -God works in many wonderful ways His mysteries to performand that perhaps explains why a tiny golden garden spider is aiding in the national defense program as she spins her web in a blackberry

patch here.

Miranda Aurantus, as the spider is called by her guardians, the Albrights, has wound an estimated two miles of golden web strands on the little three-inch reels used for shipping it to laboratories and instrument makers who buy the annual harvest. Her commercial and experimental partnership with the Albrights—Prof. John, a physicist at the Case School of Applied who runs the home place; Emil, and Emil's boy, Albert, a sopho-more at Case—is one of the strangest alliances in or out of the books.

The partners are producing a tidy cash crop out of an ordinary blackberry patch and at the same time are playing an important part in national defense because the insect's gossamer web has been found to be ideal for use as cross-hairs in precision instruments, such as bombsights, transits, sextants and scores of other visual contraptions so valuable in peace and defense.

and defense.

The Albrights sell Miranda's silken offerings at \$9 a hundred feet. The guardians say that a spider of Miranda's cooperative bent can yield as much as 550 feet of web in the insect's lifetime.

The Bureau of Standards in Weshington as well as a number.

The Burdashington well as a numb of large optical concerns, know all Miranda and her valuable

Billions of .22 Bullets **Ordered for Training**

SPRINGFIELD, Mass.-Bids on six hundred and a half million rounds of ammunition (.22 caliber short rimfire ball cartridges) to be supplied to nine Army ordnance depots will be opened January 6. Brig. Gen. Gilbert H. Stewart, commanding the armory here, said the ammunition would be used for preliminary training for solis was constructed, and diers in rifle and machine gun marksmanship.

Many Westover Officers Now in Army Air Corps

WESTOVER FIELD, Mass. change has been effected among the officers stationed at Westover Field in compliance with a recent Army order by which all nonflying officers stationed at the base with administrative duties have become members of the Air Corps.

Under this order, nearly half of Under this order, nearly hair of the officers here have become mem-bers of the Air Corps, and the re-serve insigne which they formerly had affixed to their signatures has been dropped.

44th Rings in New Year With Parties, Dances FORT DIX, N. J.-Officers and en-

listed men of the 44th Division who remained in camp over the holidays celebrated the coming of the New celebrated the coming of the New Year by staging dances and parties all over the reservation. Mrs. Ethel K. Logan, senior hostess, started the celebration ball rolling by holding a game party the night before New Year's Eve. Winners got prizes, which originally were gifts donated by the New Jersey D.A.R., but received too late for distribution at the Christmas Eve party.

On New Year's Eve impromptu parties were held in the mess halls of the various regimental areas. A special "teen age party" was held at the St. George Club for the young people of the post.

The

Od Verse

Th' Merry Capt'n.

The captain was a merry soul, A merry soul was he. He stood us up against a wall And chirped right cheerily:

"Oh, Heinie has an enfilade On yonder Rue de Paix, Oh, Heinie has a battery That's slightly in the way."

"Me noble men," the captain said,
"The rest is up to you,
I call for volunteers because— Well, what are you gonna do?"

It was a pleasant morn, you know, Just next to half-past five, When every soldier thought how good

It was to be alive.

A stretcher bunch went cursin' by With what looked like some dead, And we could hear the gentle screech Of bustin' shells ahead.

And every bloomin' soldier there From non-com down to buck Felt that for him to volunteer Was sure to bring no luck.

But the captain was a merry soul, As I said in the beginnin', And to us down-cast muckers says In manner very winnin':

"Tis not compulsory to go-Ye've got to volunteer— to those who'd rather not, me men, Take one step to the rear.'

The captain was a merry soul, And merry felt we all; For there was him, and there was

Agranst that damn' stone wall!

Arctic Patrol Trained By AC in Michigan

Man AWOL 8 Years Reports Back

HATTIESBURG, Miss.—Eight years is a long time to be AWOL, but that is the length of time Randall Kennedy, Corsicana, Tex., had been away from the Army, he told MP headquarters recently as he

"I want to see the officer in charge," Kennedy said. He related to the MP officer that he went AWOL out of Ft. Sill, Okla., on Dec. 12, 1932, explaining he has since that time been farming and truck driving

The absent-without-leave taker came to Hattiesburg to seek work at Camp Shelby. Seeing the soldiers drilling, the old military urge seized him, he said. Now he is awaiting response to a request for

where temperatures often drop to zero, the Army Air Corps is getting in some frigid patrol exercises as rigorous as any its fliers might be called upon to face in an emergency, and the requirements of this patrol work test both men and motors.

work test both men and motors.

The fliers are attached to the 6th Pursuit Wing at Selfridge Field.

Camp Skeel, situated 150 miles north of Selfridge Field, is a cold, isolated spot; there are no hangars here, and the matter of hunking the pilots and the matter of bunking the pilots and ground crewmen put the natural proclivities of rabbits in the back-

ground. The aviation soldiers literally burrow down in their huts, which have igloo appointments. Fighting the weather, from the very origin of military and commercial flying, has been a major phase of pilot training. It gets so cold here in mid-winter that a pilot upon crawling out of his bunk in country,

CAMP SKEEL, Mich.—Not all of the mornings is certain to find his the "Arctic patrol" training and experimentation of the U. S. Army is done in Alaska by any means.

Right here in Northwest Michigan, chunks of flesh on the ship. Fleecelined gloves and clothing are worn to protect the AC men as they go about their duties on the ground or

about their unit in the air.

Snow plows operated by ground crews keep landing areas clear and that means constant labor for the conflying personnel. One squadron have for this nonflying personnel. One squadron at a time is assigned here for this training in fighting the weather. The men are carrying out cold-weather flying experiments just as the Air Corps personnel in Alaska are doing.

Picture these sturdy young American Air Corps experts keeping a squadron of planes serviceable at all hours of the day and night in all sorts of weather — working in the open ice-coated spaces of the northland—and you have an important scene in a new era of military avia-tion. It has never been attempted before on the present scale in this

PLATTSBURGH BARRACKS, N. Y.—Lake Champlain lies in the northeast corner of New York state, at the top of the Valley of the Hudson, on the pathway to the Mohawk, near the St. Lawrence

It's one of the most strategic military spots in the East. It was that back in the time of the Indian Wars and of the American Revolu-tion. If you remember "Northwest Passage" you know what a tough time Rogers and his Rangers had getting through the section when the British and Mohawks held it. They went through on foot and in whaleboats, part of the time in winter. A lot of them died.

If Rogers could see Lake Cham-plain and the territory adjacent nowadays, he'd probably whistle.

nowadays, he'd probably whistle. All the men in these pictures are the modern guardians of this U. S. gateway. They're members of the 26th Infantry, now receiving winter training in ski and snowshoe exercises. Every week a detachment of 105 men and ten officers is sent to Lake Placid, 35 crow-miles ways to receive advanced training. away, to receive advanced training. Every man in the regiment is proevery man in the regiment is provided with a complete ski outfit and doesn't wait until he's told to use it. They're out every day that is cold enough and snowy enough, whether instruction is scheduled

Machine gun practice is also a part of the winter training here, and almost as much fun for recruits of the outfit as skiing. In the center picture, Lt. Albert R. Cupello (in snow-covered fur cap) instructs a group gathered around five of the curs. five of the guns.

Nine-Year-Old Boy Has 136 Hours' Flying Time

PITTSBURG, Kan.—About 15 hours of flying credit for every year of his childhood, is the record of 9-year-old Edward McFarland, 4th grade stu-

dent here. The child's father, E. H. McFarland, operates the municipal airport The young flier has run up a total of 136 hours and 10 minutes since he started soloing. He has been around planes since he was a baby and wants to be an Army pilot.

1178 Flying Cadets Finish At Kelly During 1940

Classes now entering Randolph and Kelly are the first to show the full effect of the current expansion pro-gram under which a goal of 12,000 graduates a year has been set. Ran-dolph Field now has a new class of 500 students and both classes at Kelly are larger than any previous ones to enter the Advanced Flying School. Ten classes will be graduated at Kelly during 1941, and consideration now is being given plans to restore

now is being given plans to restore specialized flying. This specialized

SAN ANTONIO, Tex.—During the past year, Kelly Field, Advanced Flying School, ing School of the Army, graduated almost as many pilots as in the preceding 18 years of its existence. Eight classes with a combined total of 1178 students were graduated at the field during 1940 with Brooks Field, nearby, assisting as a subpost of Kelly.

Classes now entering Randolph and Kelly are the first to show the full

In addition to the operations at Kelly, Randolph and Brooks fields the Gulf Training Center during 1941 will operate branches at San Angelc and Ellington Field. The latter is near Houston. Establishment of other auxiliary training fields under the Training Center is planned.

The Advanced Flying School at Kelly was established in July, 1922. In the subsequent 18 years, only 2159 students were graduated. The yearly output of graduates was slow until 1938, when the growing importance of the air arm became recognized. In that year, 31 pilots were steriled. In that year, 311 pilots were trained at Kelly. In 1939, the number was increased to 525.

Mexico Votes U.S. Use of Airfields

MEXICO CITY—The senate here, late this week, voted a bill permitting U. S. Army planes to make use of certain Mexican airfields in flights to and from the Canal Zone. It provides that U. S. Army planes carrying a crew of two pilots, three soldiers and a maximum of two passengers may make stop-overs either at Tejeria Airfield or Minatitlan.

Airfield or Minatitlan.

This follows close on the heels of the recently reported negotiations between the United States government and the Pan-American Airways. The plans embrace not only the Airway's facilities in Mexico as a base from which warplanes could operate in defense, but the utilizing of the company's fields and equipment throughout Central and South America.

As reported in Washington, the government contemplates investing millions of dollars jointly with Pan-American in the construction of hard surfaced runways, extension of existsurfaced runways, extension of exist-ing runways, enlargement of hangars, and the building of underground fuel storage tanks. At present there is no, plan to build new air bases in Mexico, and it is reported that only limited construction of new fields was projected in other republics.

The cost for the company's Mexican fields would entail between 5 and 10 million dollars, it was estimated. The improvements to the fields will

be designed to permit operation of the heaviest United States bombers and fastest fighting planes from bases provided with fuel and repair

The fundamental purpose of the project will be the defense of the Panama Canal, and the defense of the Immediate coast lines of the United States in both oceans, as well as the defense of Mexico.

29th Division Vanguard Of Junior Officers Ordered to Meade

BALTIMORE, Md.—In order to fit them for camp duties prior to induc-tion of their units into the Federal military, junior officers of the 29th Division (Maryland and Virginia NG) will be ordered to Ft. George G Meade, Md., Jan. 6.

In making this announcement over the week-end, Col. Carey Jarman, executive officer of the 5th Regiment, executive officer of the 5th Regiment, pointed out that although the Division would not be mustered into service until Feb. 3, the War Department considered it desirable to send the vanguard of junior officers to camp ahead of schedule. He said the training period of three weeks for these men would fit them for the tasks ahead and facilitate training of the entire division.

Soldiers of 44th Get Back to Work

FT. DIX, N. J.-With the Christmas and New Year holidays just a happy memory, troops of the 44th Division resumed their training Thursday morning with a lusty "back to work" spirit.

They swung back into the routine of Army life with morning setting-up exercises just to limber up those muscles which have been "at ease" since Dec. 20. The first day, however, was comparatively light.

The men were put through "re-fresher" exercises in basic training which included marching, simple tactical exercises and marksmanship.

All in all, activities of the first day vere unofficially termed a "limbering up process.

Fort Dix Gets New \$20,000 Switchboard

FT. DIX, N. J.-Prompt and efficient telephone service will become a reality here when a new five-man multiple switchboard is installed at the post's telephone exchange building. Capt. Herbert L. Schofield, post signal officer, said the switchboard, worth \$20,000, will be put into operation within a few days. tion within a few days.

Heretofore, connections between the post's 360 extensions took long to make and many an officer was at patience's end. Until the new switchboard is "cut in," connections are being made through a "detour" to the old two-man switchboard located in the post headquarters building. The the post headquarters building. The new equipment will eliminate the

Capt. Schofield said the new appawill accommodate ratus will accommodate 700 extensions without alterations or additions, and with a minimum of additional work can be extended to handle 1,200 telephones.

Engineer School Is Expanding

The Army is taking steps to bolster the strength of its Corps of Engineers—the men whose work increases the effectiveness of combat troops—by training an estimated 1,700 officers and 1,500 carefully selected enlisted men at its Engineer School at Ft. Belvoir, Va.

The school's facilities and instruct.

The school's facilities and instruct.

The school's facilities and instruction program have been expanded to meet the increasing demands for highly trained Engineer personnel necessitated by the rapidly growing Army. In recent months, it has be-come one of the largest of the Special

come one of the largest of the Special Service Schools being operated under direction of the War Department.

At present, about 200 Reserve officers are being graduated each month from the school. Special courses also are being given from time to time for selected Regular Army officers. This represents a tremendous increase in enrollment over recent years when attendance at the school averaged only about 70 officers a year.

officers a year.

To accomplish this rapid transformation, the school has expanded be-yond its normal facilities and is mak-ing use of all available expedients. Quartered in tents during the summer and early fall, student officers and enlisted men are now housed in frame barracks. Lectures and con-ferences are held in the Post Theater, using projected film slides in the place of charts.

As the number of courses and num-As the number of courses and number of students in each course have increased, the time has been shortened and work intensified. Instead of starting at 8:30 a.m. and ending at 4:00 p.m., the school day now begins at 6:30 a.m. and is not really finished until 8:00 p.m. when the students are released from a study period which starts immediately after supper.

after supper.

A class of 38 officers of the Reg-ular Service recently completed a course in Assault Tactics. Attending this course were 30 Engineer Officers,

The Assault class was divided into twelve committees, to each of which was assigned a particular phase for study and report. Facilities were af-forded for experiments with all kinds and types of equipment. A fortified zone with fixed emplacements and wire entanglements was erected, and then tested under various methods then tested under various methods of attack and defense. Experiments were made with different types of bridge equipment. Defenses against mechanized forces were tested, inmechanized forces were tested, in-cluding barriers and obstacles to tanks, a light tank platoon of six tanks beging furnished by the Armored Corps for this purpose. It is expected that from the results of the studies and tests carried out in this course, a number of new meththis course, a number of new meth-ods will be adopted as standard pro-cedure in future engineer operations.

Refresher Courses Also

Since July 1 the Engineer School has conducted four one-month Re-fresher Courses for Reserve and National Guard Officers to prepare them to take their places in the Army of the United States. The course of instruction is limited to company officers and deals primarily with Tactics and Technique of Engineers, and Tactics and Technique of the Infan-Tactics and Technique of the Infan-

try.
Infantry combat and the use of all infantry weapons is stressed, along with bridge and road construction, water supply, demolitions, obstacles to the enemy, particularly antimechanized defense, use of heavy equipment, engineer reconnaissance, and the tactical use of Engineer troops. The School has access to all available reports on methods used in the present World War, and where the application exists, the instruction includes new developments that are cludes new developments that are adaptable to Engineer technique.

The School is now conducting a five weeks' course for Reserve officer instructors for the Engineer Replacement Centers, which will open early in the spring for selective service men. It will conduct two more of these instructor courses and professional services and professional services. these instructor courses and prob-ably four more of the one-month courses before July, 1941.

In addition to these courses for officers, the Engineer School will conduct a course during January and February, 1941, for more than 800 Noncommissioned Officers who will later serve as N.C.O. instructors at the Engineer Replacement Centers. Officer instructors for the N.C.O. Course will be selected from the graduates of the First Officer Instructor Course now in progress.

Two Replacement Centers, one at Ft. Belvoir and one in the Mark Twain National Forest in Missouri,

are scheduled to open in March, each with some 10,000 trainees reporting for a 13-weeks' course of instruction. These Centers will be schools in themselves, as the trainees will be given all basic and some specialist' training arter to injury their perms. training prior to joining their perma-nent organizations. It is expected that by this method, the Trainees will reach their organizations trained and equipped to take their places in ranks, and that the remaining time of the one-year's enlistment will be

Engineer School activities to include all ranks. Now, instead of the re-cruits getting their basic training in the unit to which they are assigned, all will be trained under a centralized system. The problems of achieving uniformity of training will be greatly simplified and units can reach a desired level of efficiency under this system much more quickly. system much more quickly.

Courses for Enlisted Men

In addition to all this basic combat and engineer training, the Engineer School conducts courses for Enlisted Specialists. The Enlisted Men's School for Engineer Specialists, conducted at Ft. Belvoir, will expand from 60 to about 320 students by April, 1941, in order to train specialists for new units and National Guard units. Two large buildings are now under construction to provide additional classroom and shopfacilities. Engineer soldiers who graduate from this school generally and engineer training, the Engineer facilities. Engineer soldiers who graduate from this school generally receive specialist grades and ratings on return to their organizations, with consequent pay increases. The courses are not necessarily military in the trade meaning, but they naturally concentrate on meeting Army requirements for specialist training.

Engineer soldiers who take specialist courses should have at least four months' service. Admission to the School is on approval of the Unit Commander and the Chief of Engineers. The specialist courses, which are repeated every three months, include Water Purification, Heavy Mechanical Equipment, Surveying, Drafting, Map Reproduction and Photography

and Photography.

The object of all Engineer training is to increase the effectiveness of combat troops by improvement of combat troops by improvement of routes of communication, creation of obstacles to enemy progress, and aid in the construction of protective works. This objective is the guiding principle in all Engineer School programs of training. New methods of combat requires the program of the program o combat require new means to make them effective or to defend against them, and the Engineer School is

Sarge Looks Over a Watch

ONE OF THE BUSIEST places at Fort Dix, N. J., is the Post Exchange, where a soldier can buy anything from a finger-nail file to a toothpick. He can even get his picture taken by one of those "four-for-a-dime-take-it-yourself" gadgets. PX Clerk Ronald Watson, right, says, business is good and soldiers are great spenders, even if they don't make much. Rings, ornaments, magazines and small trinkets for the girl back home are best sellers, he says. Above, Watson shows Sgt. Edmund Sovine, Co. A, 104th Engineers,

Army Opposes Restricting Draft to 21-Year Olds Now

Some Congressmen and others is basically a permanent one of comhave been discussing the feasibility pulsory military training, whereas of a plan to limit conscription to 21-year-old men, but military authorities around the War Department said Army in a relatively short time. this week the proposal is premature by at least three years.

War Department officials explained that it was to avoid jeopardizing a that it was to avoid jeopardizing a large group of young men in one age group that the existing Selective Service law was formulated. It was pointed out that should the nation get into war, with most of its soldiery 21 years of age, naturally most of the casualties would be in that bracket and that would be untain the 21 years olders, besides fair to the 21 year-oldsters, besides inflicting a hardship upon the nation at some period when these men would be needed to carry on their share of normal activities in civilian

It was conceded by some military men that the European plan of conscription by individual age groups has some advantages over the sys-tem now in use in America. But they stress that the European system have elapsed

Census records show that about 1,300,000 youths come of age every year in the United States. Doubt was expressed by some authorities that an army of 900,000 men could be obtained from this one group to fill the year-training quota called for under the present setup. However, the difficulty might be overcome to a large extent by permitting the training of youths to start at any time after they become 18 years of

Those who feel that the 21 year age plan at present is premature point out that within three years such a plan might be feasible, in that approximately 2,400,000 men between the ages of 21 and 36 will have been the ages of 21 and 36 will have been trained by that time. This large re-serve, it was pointed out, might easily permit our adoption of the European system after three years

They're All in the Army

FITTING their first Army shoes snugly, these 11 purebred Irish Setter pups regard the regimental crests of the 27th Division at Fort McClellan, Ala., and contemplate the future.

For they're all destined to "command" one of the Division's regiments when they can be trusted away from their dam. That's an order from Maj. Gen. William N. Haskell, 27th Division Commander.

General Haskell bought the pups from a medical officer who was about to be transferred from the post. They were named honorary colonels and each assigned to a regiment.

They're about six weeks old now. A sergeant has been detailed to care for them. They live in a small house which is heated and has all modern facilities. It is called the "Pup Tent," naturally. -Army Times-Wide World Photo

Construction Reported Ah Of Schedule in Many Are

FT. BELVIOR, Va. reports that cilities for the 44th Div. as work on 21 buildings has been completed ahead of time, and that 33 more will be ready for accupancy later this week. The fort's building program calls for the construction of more than 600 buildings, involving an outlay of about \$7,000,000.

FT. MEADE, Md. where construc-tion of 38 buildings has hundreds of carpenters busy, will be ready to run full blast in a short time.

FT. BENNING, Ga. has asked for bids for the construction of a temporary type theater, with a seating capacity of 1,038. Awards have alread been made for four such theaters, two in the 4th Division area, one in

the vicinity of the 2d Armored Divi-sion and one on the post proper. Other structures, involving an ex-penditure of \$654,732, are announced. One project will require the erection of 78 cantonment type buildings, barracks, mess halls, supply and recreation buildings, cold storage plants,

FT. BRAGG, N. C. reports that all the huge building program is being completed either on schedule or ahead of schedule. "Being erected at a cost of \$30,227,000, the 2478 buildings in the current construction program provides employment for about 23,-560 workmen."

FT. DIX, N. J. where housing fa-

Just Looked Lonesome

Many ways for "taking the cake' nave been recorded but a retired Army general got one just for "look-ing lonesome."

The cake donor was Miss Joy Wad-leigh, hostess on the Pennsylvania-Central Airlines, and the story didn't leak out until this week-end although the cake was presented on New Year Day—to Brig. Gen. Samuel T. Ansell, Ret., Currituck County, N. C. It happened in mid-air.

Miss Wadleigh, who has been with the airline only a few weeks, admitted that she noticed the general looked lonely. He told her it was his 66th birthday anniversary and that he was on his way home. When the hostess got back to Washington she burght a birthday cake all covered bought a birthday cake all covered with pink icing and after the general boarded the plane to return to the National Capital, the young wo-man set the birthday remembrance in front of him.

General Ansell blew out the lone candle atop the cake while passengers and crew sang "Happy Birthday." The honored passenger wasn't lone-

Greetings Arrive From Panama

Lt. Gen. Daniel Van Voorhis, Commanding Panama Canal Department:

partment:
During the past year the members of this command have shown themselves to be true soldiers. You have cheerfully accepted and successfully carried out each of the increased tasks imposed by the need of our country's defense. Your morale and esprit have been magnificent. magnificent.

I am proud of you and to each and every one I extend my best wishes for a Merry Christmas and a Happy New Year.

Tank Arsenal Rising Fast

Despite heavy snowstorms and low emperatures, progress on the Tank Arsenal being constructed by the Chrysler Corp. at Detroit. Mich., has not been retarded, the War Depart-ment announced this week.

The arsenal is the largest of its type in the world. It will be 1380 feet long and 500 feet wide and will cost around 20 million dollars. The War Department already has placed an order for 1000 25-ton tanks to cost approximately 33½ millions with pro-duction scheduled to start next fall. It is expected that after Oct. 1 five tanks will be produced each day

Lt. Colonels Considered For General Ranking

About 250 Lieutenant Colonels are being considered for permanent general officer ranking regardless of whether they have six years yet to serve before retirement age. It is the first list under the provisions of the new law completed its task this week. Only lieutenant colonels with 28 years' continuous commissioned servace vere considered. It is understood that the board considered colonels and lieutenant colonels down to and permitting such consideration was

Hell Out of Them

Travis to Retire This Month

Retirement of Brig. Gen. Robert J. Travis, National Guard officer at present serving with the 30th Division, Ft. Jackson, S. C., has been announced by the War Department. Gen. Travis will reach the statutory age Jan 13. age Jan. 13.

passed last June and the board of Major Generals which compiled the first list under the provisions of the new law completed its task this week.

Glass Would Shoot

Fiery Senator Carter Glass, out-spoken critic of the Roosevelt Administration on domestic policies, is in complete accord with FDR on the foreign policy statement made this

"I'm in favor of sending the Navy nd shooting the Devil out of the axis powers," he said. "To put it here emphatically, to shoot the Hell Axis powers, more out of the Axis powers."

Called to Front Line Duty

Corporal Calorie of 1917 has become General Vitamin of 1940. | fourth for emergency situations. The value of vitamins B and C, found in citrus fruits and fresh vegetables, has been recognized and they have become "must" on America's military menu. Every member of the fighting forces, Army and Navy, is going

to get eight ounces of orange juice daily, not only to keep him in

peak physical form but topromote wound-healing in case of actual hos tilities. California and Florida will provide the bulk of the oranges. Since 1917-18, the whole science of nutrition has been revised on the vitamin basis. American soldiers in

the last war suffered a great deal from trenchmouth disease, despite a large ration from a caloric standpoint. Science knows now that the disease was caused by a lack of Vitamin C, provided in citrus fruits.

The present Army ration is to pro-vide four times as much Vitamin B as has been set up in government

standards as a safe minimum.

The daily minimum of thiamin (or B1) for Army men will be 1,000 international units, whereas the old government standard was 250. This increase is in recognition of the greater stress placed upon the human body in military life than in civil life. civil life.

Greater mechanization of the Army, however, is expected to reduce some of the strain formerly duce some of the strain tor undergone by the foot soldier.

"Spike" Life's Staff

The Army's daily dosage of Vitamin C also has been quadrupled. The new requirement is 100 milligrams a day, or the equivalent of an eight-ounce glass of orange juice. Such an amount of orange juice will provide 1/32 of the Vitamin B re-

Special studies are being made at Wright Field, Ohio, on the dietary

eeds of flyers.
California Institute of Technology scientists and March Field officers have been conferring on special phases of the nutrition problem. It is the so-called "Caltech plan" for "spiking" bread with Vitamin B1,

which has been adopted on a national scale.

In the World War, the standard daily diet called for 4,199 calories, but took no account of the need for fresh vegetables and fruit. The daily fare in the Army then was made up in this way:

Bacon	12	OZ.
or fresh meat	20	oz.
Bread	18	oz.
Beans	2.4	oz.
Potatoes	20	oz.
Prunes or preserves	1.28	02.
Coffee		
Sugar	3.2	oz.
Evaporated milk	5	oz.
Vinegar	0.16	gills
Salt	0.64	oz.
Pepper (black)	0.04	OZ.
Lard		
Butter	0.5	OZ.
Now the Army is provide	ling	fou
distinct diets.	-	
One in for mometer and		

One is for regular cantonments, another for isolated stations, the third for combat areas, and the

Five Brothers Are All Res. Officers

PHILADELPHIA-The five brothers, Edward, Alexander, Henry, George and Joseph of the house of Davisson, Philadelphia, are Reserve officers in the Army. The quintet is divided between the infantry, cavalry and artillery. Dr. and Mrs. Alexander Davisson are the proud parents.

Why It Tastes Funny

In case you can't understand why No. 4—the emergency ration—tastes that way, here's the reason: When the chocolate bar was first issued as a ration it tasted so good that the boys kept nibbling at it when no "emergency" existed. So it was fla-vored to keep them from eating it

until they get pretty hungry.

The basic calory content of the standard Army diet now runs up to 4,500 calories daily as contrasted with the World War 4,199. However, it may be reduced if it is discovered that mechanization really does reduce the strain on the men.

Anyway, General Vitamin is the big guy now. Get set to salute him. estimated cost of \$11,132
